

advertising, promotion, offering for sale, or sale of any product or service, from making any misrepresentation about the existence, contents, validity, results, conclusions, or interpretations of any test, study, or other research, or that any product or service is scientifically or clinically proven to produce any benefit.

- Part V of the order requires that respondents, with regard to any human clinical test or study upon which they rely to substantiate any claim covered by the order, must preserve all underlying data and documents generally accepted by experts in the field as relevant to an assessment of the test.

- Part VI of the order provides that nothing in the order prohibits respondents from making a representation for any drug that is approved in labeling for such drug under any tentative final or final monograph promulgated by the Food and Drug Administration, or under any new drug application approved by the FDA.

Parts VII through XI are reporting and compliance provisions. Part VII mandates that respondents acknowledge receipt of the order and, for 10 years, distribute the order to certain employees and agents and secure acknowledgments from recipients of the order. Part VIII requires that respondents submit compliance reports to the FTC one year after the order's issuance and submit additional reports when certain events occur. Part IX requires that, for 10 years, respondents create certain records and retain them for at least 5 years. Part X provides for the FTC's continued compliance monitoring of respondents' activity during the order's effective dates. Part XI is a provision "sunsetting" the order after 20 years, with certain exceptions.

The purpose of this analysis is to facilitate public comment on the proposed order. It is not intended to constitute an official interpretation of the complaint or order, or to modify in any way the order's terms.

By direction of the Commission.

Donald S. Clark,
Secretary.
