SUPPLEMENTARY INFORMATION:

Title: FERC–576, Report of Service
Interruptions.

OMB Control No.: 1902–0004.

Type of Request: Three-year extension
of the FERC–576 information collection
requirements with no changes to the
current reporting requirements.

Abstract: A natural gas company must
obtain Commission authorization to
engage in the transportation, sale, or
exchange of natural gas in interstate
commerce under the Natural Gas Act
(NGA).¹ The NGA also empowers the
Commission to oversee continuity of
service in the transportation of natural
gas in interstate commerce. The
information collected under FERC–576
notifies the Commission of: (1) Damage
to jurisdictional natural gas facilities as
a result of a hurricane, earthquake, or
other natural disaster, or terrorist
activity, (2) serious interruptions to
service, and (3) damage to jurisdictional
natural gas facilities due to natural
disaster or terrorist activity, that creates
the potential for serious delivery
problems on the pipeline's own system
or the pipeline grid.

Filings (in accordance with the
provisions of section 4(d) of the NGA)²
must contain information necessary to
advise the Commission when a change
in service has occurred. Section 7(d) of
the NGA³ authorizes the Commission to
issue a temporary certificate in cases of
emergency to assure maintenance of
adequate service or to serve particular
customers, without notice or hearing.

Respondents to the FERC–576 are
encouraged to submit the reports by
email to pipeline.outage@ferc.gov but
also have the option of faxing the
reports to the Director of the Division of
Pipeline Certificates. 18 CFR 260.9(b)
requires that a report of service
interruption or damage to natural gas
facilities state: (1) The location of the
service interruption or damage to
natural gas pipeline or storage facilities;
(2) The nature of any damage to pipeline
or storage facilities; (3) Specific
identification of the facilities damaged;
(4) The time the service interruption or
damage to the facilities occurred; (5)
The customers affected by the service
interruption or damage to the facilities;
(6) Emergency actions taken to maintain

service; and (7) Company contact and telephone number. The Commission may contact pipelines reporting damage or other pipelines to determine availability of supply, and if necessary, authorize transportation or construction of facilities to alleviate constraints in response to these reports.

A report required by 18 CFR 260.9(a)(1)(i) of damage to natural gas facilities resulting in loss of pipeline throughput or storage deliverability shall be reported to the Director of the Commission's Division of Pipeline Certificates at the earliest feasible time

when pipeline throughput or storage deliverability has been restored.

In any instance in which an incident or damage report involving jurisdictional natural gas facilities is required by Department of Transportation (DOT) reporting requirements under the Natural Gas Pipeline Safety Act of 1968, a copy of such report shall be submitted to the Director of the Commission's Division of Pipeline Certificates, within 30 days of the reportable incident.⁴

If the Commission failed to collect these data, it would lose the ability to

monitor and evaluate transactions, operations, and reliability of interstate pipelines and perform its regulatory functions. These reports are kept by the Commission Staff as non-public information and are not made part of the public record.

Type of Respondents: Natural gas companies.
