

The petitioners claim that Enlin, Vinox, and E N Corporation are affiliated, pursuant to section 771(33) of the Act and 19 CFR 351.102(b), based on Enlin's direct statement of affiliation with Vinox in its Section A questionnaire response of the initial investigation, evidence of control over Vinox and E N Corporation by the same individuals or family members, similar or identical company addresses, and a common Canadian trademark.<sup>15</sup>

Pursuant to 19 CFR 351.401(f), Commerce will collapse affiliated entities when there is: (1) Evidence that the entities have production facilities for similar or identical products that would not require substantial retooling of either facility in order to restructure manufacturing priorities; and (2) a significant potential for the manipulation of price or production, such as through common ownership, overlap of directors and managers, and intertwined operations. There is evidence on the record to support that these criteria have been met.<sup>16</sup> Specifically, record evidence demonstrates that: (1) Enlin, Vinox, and E N Corporation are affiliated parties that each produce or have produced the subject merchandise and have shipped it to the same or similar importers in the United States, and (2) there is a "significant potential for the manipulation of price or production," if we do not collapse the companies due to the level of common direction or control.<sup>17</sup>

Accordingly, given the evidence provided by the petitioners,<sup>18</sup> along with Enlin's acknowledgement that the three companies should be treated as a single entity and that CBP should collect antidumping duty cash deposits on all unliquidated entries made by Vinox and E N Corporation at the rate assigned to Enlin,<sup>19</sup> we find that: (1) There were sufficient changed circumstances in the trading patterns and activities of Enlin, Vinox, and E N Corporation that the petitioners allege resulted in a possible evasion of the *Order*; (2) Enlin, Vinox, and E N Corporation should be collapsed as a single entity; (3) the collapsed entity is subject to the cash deposit rate assigned to Enlin in the LTFV investigation;<sup>20</sup> and (4) the results of this CCR are

applied retroactively from the publication date of the *Order*.<sup>21</sup>

#### Instructions to U.S. Customs and Border Protection

As a result of this determination, we find that both Vinox and E N Corporation are subject to the cash deposit rate currently assigned to Enlin (*i.e.*, 33.81 percent).<sup>22</sup> Therefore, Commerce will instruct CBP to continue suspension of liquidation and to collect estimated antidumping duties for all unliquidated entries and shipments of subject merchandise produced and exported by Enlin, Vinox, and/or E N Corporation at the cash deposit rate of 33.81 percent currently assigned to Enlin, from the date of the publication of the *Order*.<sup>23</sup> This cash deposit requirement shall remain in effect until further notice. We will also instruct CBP to liquidate any unliquidated entries and shipments of subject merchandise produced and exported by Vinox and/or E N Corporation made during periods for which Commerce has completed an administrative review or for which no administrative review was requested (*i.e.*, through and including January 31, 2018) at the 33.81 percent rate currently assigned to Enlin.

#### Notification to Parties

This notice is the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

Commerce is issuing and publishing these results in accordance with sections 751(b)(1) and (4) and 777(i) of the Act, and 19 CFR 351.216 and 19 CFR 351.221(c)(3)(i).

#### Request for Information Regarding Measurement Science Needs for Water Use Efficiency and Water Quality in Premise Plumbing Systems

**AGENCY:** National Institute of Standards and Technology, Department of Commerce.

**ACTION:** Request for Information (RFI).

**SUMMARY:** Premise plumbing systems are key to the built environment, given that our ability to live and thrive in buildings is highly dependent on efficient and sustainable access to potable water. The design of premise plumbing systems in the U.S. is based in part on decades-old data embodied in building codes, much of which was developed at the National Institute of Standards and Technology (NIST).
