History and Description of the Remains

In 1963, human remains representing,
at minimum, one individual were
removed by an unknown individual
from an unrecorded site, designated AZ
2000-296, possibly located in the
Tucson metropolitan area in Pima
County, AZ. This collection was mailed
anonymously to the University of
Arizona, School of Anthropology from
Florida in March 2000. The collection
was subsequently brought to ASM. No
known individuals were identified. The
three associated funerary objects are one
ceramic bowl, one ceramic jar, and one
ceramic sherd. The human remains
likely date to the Hohokam Classic
period, A.D. 1150-1450, based on
ceramic typology.

In 1992, human remains representing,
at a minimum, one individual were
removed from site AZ AA:12:252(ASM),
located in the eastern portion of the
Santa Cruz River flood plain in the
Tucson Basin, in Pima County, AZ,
during testing and data recovery carried
out over the course of the Rillito-Toltec
Loop Testing and Data Recovery Project.
The project was conducted by
Archeological Consulting Services
under the direction of Barabara
Macnider and David Gregory. The
human remains were received by ASM
in 1994. No known individuals were
identified. No associated funerary
objects are present. This site is
described as a large, multi-component
Hohokam sherd and lithic artifact
scatter. Based on this description, these
human remains date to around A.D.
450-1450, which encompasses the
Hohokam cultural sequence.

In 1982, human remains representing,
at a minimum, one individual were
removed from site AZ AA:16:6(ASM),
located west of the Santa Cruz River in
the Tucson metropolitan area, Pima
County, AZ, during survey and
excavation work conducted by the
University of Arizona, under the
direction of Paul Fish. The human
remains were not recognized at the time
of the survey. After completion of the
