Abstract: The U.S. Environmental Protection Agency (EPA) adopted requirements for marine vessels operating in and around U.S. territorial waters to use reduced-sulfur diesel fuel. This requirement does not apply for steamships, but it would apply for steamships that are converted to run on diesel engines. A regulatory provision allows vessel owners to qualify for a waiver from the fuel-use requirements for a defined period for such converted vessels. One condition of the exemption from the fuel standard is that engines meet current emission standards. EPA uses the data to oversee compliance with regulatory requirements, including communicating with affected companies and answering questions from the public or other industry participants regarding the waiver in question. Since the IMO Tier III NO_x standards apply for Category 3 engines installed on U.S. vessels, we don't expect anyone to use the steamship exemption.

Form numbers: None.

Respondents/affected entities: 0.

Respondent's obligation to respond: Required to obtain a benefit (40 CFR 1043.95).

Estimated number of respondents: 0.

Frequency of response: One time for a new notification.

Total estimated burden: 0 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$0.

Changes in estimates: The burden estimate decreases from the current estimate of 14 hours per year in the total estimated respondent burden currently approved by OMB. Since the IMO Tier III NO_x standards apply for Category 3 engines installed on U.S. vessels, we don't expect anyone to use the steamship exemption.

Abstract: Subtitle C of the Resource Conservation and Recovery Act (RCRA) creates a comprehensive program for the safe management of hazardous waste. Section 3004 of RCRA requires owners and operators of facilities that treat, store, or dispose of hazardous waste to comply with standards established by EPA that are to protect the environment. Section 3005 provides for implementation of these standards under permits issued to owners and operators by EPA or authorized States. Section 3005 also allows owners and operators of facilities in existence when the regulations came into effect to comply with applicable notice requirements to operate until a permit is issued or denied. This statutory authorization to operate prior to permit determination is commonly known as "interim status." Owners and operators of interim status facilities also must comply with standards set under Section 3004.

This ICR examines the ground-water monitoring standards for permitted and interim status facilities at 40 CFR parts 264 and 265, as specified. The ground-water monitoring requirements for regulated units follow a tiered approach whereby releases of hazardous contaminants are first detected (detection monitoring), then confirmed (compliance monitoring), and if necessary, are required to be cleaned up (corrective action). Each of these tiers requires collection and analysis of ground-water samples. Owners or operators that conduct ground-water monitoring are required to report information to the oversight agencies on releases of contaminants and to maintain records of ground-water monitoring data at their facilities. The goal of the ground-water monitoring program is to prevent and quickly detect releases of hazardous contaminants to groundwater, and to establish a program

whereby any contamination is expeditiously cleaned up as necessary to protect human health and environment.

Form Numbers: None.

Respondents/affected entities:

Business or other for-profit; and State, Local, or Tribal Governments.

Respondent's obligation to respond: Mandatory (RCRA Sections 3004 and 3005).

Estimated number of respondents: 813.

Frequency of response: quarterly, semi-annually, and annually.

Total estimated burden: 136,258 hours per year. Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$25,524,890 (per year), includes \$20,411,396 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an increase of 19,231 hours in the total

estimated respondent burden compared with the ICR currently approved by OMB. This increase is due to an increase in the respondent for permitted facilities.

Director, Regulatory Support Division.
