Under the Gold Acres Pit Partial Backfill Alternative, the proposed expansion of the existing Gold Acres Pit would be completed prior to development of the proposed satellite pits (Alta, Bellwether, and Pasture), with the waste rock from the satellite pits (30 million tons) placed as backfill in the Gold Acres Pit to an approximate elevation of 5,440 feet amsl (Figures 2–18 and 2–19). This would result in a 72-acre reduction in the proposed new disturbance for the Gold Acres North Waste Rock Facility. The pit bottom elevations for the expanded Gold Acres Pit and proposed satellite pits would be the same as described for the Proposed Action. No dewatering would be required for the proposed expansion of open pit operations at the Gold Acres Complex as the proposed pit bottom elevations would be above the groundwater table. Therefore, proposed dewatering and water management operations would be the same as under the Proposed Action.

Under the No Action Alternative the proposed facilities and facility modifications, as well as the proposed operations modifications, that comprise the Deep South Expansion Project would not be developed or implemented. Under this alternative, the existing mining and processing operations in the Project Area and the current off site transport of refractory ore to the Goldstrike Mill for processing and backhaul of Arturo Mine oxide ore to the Pipeline Complex for processing would continue under the terms of current permits and approvals as authorized by the BLM and State of Nevada.

The DEIS describes and analyzes the Proposed Project's direct, indirect, and cumulative impacts on all affected resources. In addition to the Proposed Project, one additional alternative was analyzed, including the Gold Acres Pit Partial Backfill alternative, and the No Action Alternative.

On March 29, 2017, a Notice of Intent was published in the **Federal Register** (80 FR 58501) inviting scoping comments on the Proposed Action. The BLM held a public scoping meeting in Battle Mountain on April 18, 2017, Crescent Valley on April 19, 2017 and Elko, Nevada on April 20, 2017. The BLM received six scoping comment submittals during the scoping period. Concerns raised included impacts to water resources, air quality, wildlife, and recreation.

The BLM has utilized and coordinated the NEPA scoping and

comment process to help fulfill the public involvement requirements under the National Historic Preservation Act (NHPA) (54 U.S.C. 306108) as provided in 36 CFR 800.2(d)(3), and the agency continues to do so. The information about historical and cultural resources within the area potentially affected by the Proposed Project has assisted the BLM in identifying and evaluating impacts to such resources in the context of both NEPA and the NHPA.

The BLM has consulted and continues to consult with Indian tribes on a government-to-government basis in accordance with Executive Order 13175 and other policies. Tribal concerns, including impacts to Indian trust assets and potential impacts to cultural resources have been analyzed in the DEIS. Federal, State, and local agencies, along with tribes and other stakeholders that may be interested in or affected by the Proposed Project, are invited to participate in the comment process.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.
