FRA believes that soliciting public comment will promote its efforts to reduce the administrative and paperwork burdens associated with the collection of information that Federal regulations require. In summary, FRA reasons that comments received will advance three objectives: (1) Reduce reporting burdens; (2) ensure organization of information collection requirements in a “user-friendly” format to improve the use of such information; and (3) allow an accurate assessment of the resources expended to retrieve and produce information requested. See 44 U.S.C. 3501.

The summaries below describe the ICR that FRA will submit for OMB clearance as the PRA requires:

Title: The Impact of Commute Times on the Fatigue and Safety of Locomotive Engineers.

OMB Control Number: 2130–NEW.

Abstract: Time-on-task and time awake are two well-known factors that contribute to fatigue. Time-on-task refers to the length of time a person has been performing a task, whereas time awake refers to the length of time since a person last slept. Both of these factors can have a detrimental effect on performance, with the risk of adverse safety events (e.g., crashes) increasing as the length of time that a person performs a task or remains awake increases. These factors also influence each other; that is, the negative effects of increasing time-on-task may become evident sooner if the person has also been awake for a long time. Drivers with longer commutes experience greater time awake and time-on-task than drivers with shorter commutes. A growing body of evidence from a number of industries (e.g., medical, mining, long-haul trucking) suggests that commuting time has a detrimental impact on driving performance, particularly when combined with night-time shift work. However, the extent to which these factors impact the fatigue and safety of locomotive engineers remains unknown.

Type of Request: New information collection.

Affected Public: Railroad Workers.

Forms: FRA F 245.

Respondent Universe: 35,000 locomotive engineers.

Frequency of Submission: Single submission per person.

Reporting Burden: The estimated total annual burden is 1,750 hours across the 5,250 locomotive engineers (estimating a 15% response rate). Each locomotive engineer completes a single online

questionnaire and the questionnaire is estimated to take 20 minutes.

Total Estimated Annual Responses: 5,250 responses.

Total Estimated Annual Burden: 1,750 hours.

Under 44 U.S.C. 3507(a) and 5 CFR 1320.5(b) and 1320.8(b)(3)(vi), FRA informs all interested parties that it may not conduct or sponsor, and a respondent is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Authority: 44 U.S.C. 3501–3520.

Chief Counsel.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information that they conduct or sponsor. “Collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) to include agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of title 44 requires federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, the OCC is publishing notice of the proposed collection of information set forth in this document.

Section 1473(p) of the Dodd-Frank Wall Street Reform and Consumer Protection Act² provides that if the Appraisal Subcommittee (ASC) of the Federal Financial Institutions Examination Council (FFIEC) determines, six months after enactment of that section (*i.e.*, January 21, 2011), that no national hotline exists to receive complaints of non-compliance with appraisal independence standards and Uniform Standards of Professional Appraisal Practice (USPAP), then the ASC shall establish and operate such a hotline (ASC Hotline). The ASC Hotline shall include a toll-free telephone number and an email address. Section 1473(p) further directs the ASC to refer complaints received through the ASC Hotline to the appropriate government bodies for further action, which may include referrals to OCC, the Federal Reserve Board (Board), the Federal Deposit Insurance Corporation (FDIC), the National Credit Union Administration (NCUA), the Bureau of Consumer Financial Protection (CFPB), and state agencies. The ASC determined that a national appraisal hotline did not exist at a meeting held on January 12, 2011, and a notice of that determination was published in the **Federal Register** on January 28, 2011, (76 FR 5161). As a result, the ASC established a hotline to refer complaints to appropriate state and federal regulators.

Representatives from the OCC, the Board, the FDIC, the NCUA (Agencies), and the CFPB met and established a process to facilitate the referral of complaints received through the ASC Hotline to the appropriate federal

financial institution regulatory agency or agencies. The Agencies developed the Interagency Appraisal Complaint Form to collect information necessary to take further action on the complaint. The CFPB incorporated the process into one of their existing systems.

The Interagency Appraisal Complaint Form was developed for use by those who wish to file a formal, written complaint that an entity subject to the jurisdiction of one or more of the Agencies has failed to comply with the appraisal independence standards or USPAP. The Interagency Appraisal Complaint Form is designed to collect information necessary for the Agencies to take further action on a complaint from an appraiser, other individual, financial institution, or other entities. The Agencies use the information to take further action on the complaint to the extent the complaint relates to an issue within their jurisdiction.

OMB Control No.: 1557–0314.

Estimated Number of Respondents: 100.

Estimated Burden per Response: 0.5 hours.

Estimated Total Annual Burden: 50 hours.

Comments are invited on:

(a) Whether the collection of information is necessary for the proper performance of the functions of the OCC, including whether the information has practical utility;

(b) The accuracy of the OCC’s estimates of the burden of the collection of information;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;
