

position or who have access to classified information. The requirements relating to national security are mandated by the Director of National Intelligence as the Security Executive Agent. The majority of the reports relate to the submitter's personal conduct and activities. There is one form for personnel to submit information on other personnel, consistent with government-wide reporting requirements. This collection request seeks approval for contractors and other non-federal employees who are processed for access to classified information to utilize the Department's automated reporting system called iReport, or, for the small population with no access to the IT system, to utilize PDF fillable forms to report the required information. The Security and Emergency Planning Staff, and other Department Security Offices, will use the reported information to determine the submitter's continued fitness for employment at the Department of Justice or continued eligibility for access to national security information. The Department security offices for each agency component will review, evaluate, and adjudicate the information received.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:*

a. Department-wide population covered by the requirement to self-report information in the forms listed in Sections 2a and 2b is estimated at 35,000. It is estimated that only three percent (1,050) will actually need to self-report.

b. Department-wide population covered by the requirement to report information in the forms listed in Sections 2c through 2l is estimated to be less than 500.

c. Amount of time estimated for an average reported is less than ten minutes.

6. *An estimate of the total public burden (in hours) associated with the collection:* 260 annual burden hours.

If additional information is required contact: Melody D. Braswell, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE, 3E.405A, Washington, DC 20530.

Dated: October 23, 2018.

Melody D. Braswell,
Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410-BA-P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

[OMB Control No. 1219-0030]

Proposed Extension of Information Collection; Main Fan Operation and Inspection (I-A, II-A, III, and V-A Mines)

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Request for public comments.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed collections of information in accordance with the Paperwork Reduction Act of 1995. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments on the information collection for main fan operation and inspection (I-A, II-A, III, and V-A mines).

DATES: All comments must be received on or before December 26, 2018.

ADDRESSES: Comments concerning the information collection requirements of this notice may be sent by any of the methods listed below.

- *Federal E-Rulemaking Portal:* <http://www.regulations.gov>. Follow the on-line instructions for submitting comments for docket number MSHA-2018-0030.

- *Regular Mail:* Send comments to USDOL-MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, VA 22202-5452.

- *Hand Delivery:* USDOL-Mine Safety and Health Administration, 201 12th Street South, Suite 4E401, Arlington, VA 22202-5452. Sign in at the receptionist's desk on the 4th floor via the East elevator.

FOR FURTHER INFORMATION CONTACT: Sheila McConnell, Director, Office of Standards, Regulations, and Variances, MSHA, at MSHA.information.collections@dol.gov (email); (202) 693-9440 (voice); or (202) 693-9441 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

Potentially gassy (explosive) conditions underground are largely controlled by the main fans. When accumulations of explosive gases, such as methane, are not swept from the mine by the main fans, they may reasonably be expected to contact an ignition source. The results of such contacts are usually disastrous, and multiple fatalities may be reasonably expected to occur. The standard contains significantly more stringent requirements for main fans in "gassy" mines than for main fans in other mines. Title 30 CFR 57.22204, which only applies to metal and nonmetal underground mines that are categorized as "gassy," requires main fans to have pressure-recording systems. This standard also requires main fans to be inspected daily while operating if persons are underground and certification made of such inspections by signature and date. Certifications and pressure recordings must be retained for one year and made available to authorized representatives of the Secretary of Labor.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection related to main fan operation and inspection (I-A, II-A, III, and V-A mines). MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information has practical utility;
- Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

The information collection request will be available on <http://www.regulations.gov>. MSHA cautions the commenter against providing any information in the submission that should not be publicly disclosed. Full comments, including personal information provided, will be made available on www.regulations.gov and www.reginfo.gov.

The public may also examine publicly available documents at USDOL-Mine Safety and Health Administration, 201 12th South, Suite 4E401, Arlington, VA 22202-5452. Sign in at the receptionist's desk on the 4th floor via the East elevator.

Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION** section of this notice.

III. Current Actions

This request for collection of information contains provisions for main fan operation and inspection (I-A, II-A, III, and V-A mines). MSHA has updated the data with respect to the number of respondents, responses, burden hours, and burden costs supporting this information collection request.

Type of Review: Extension, without change, of a currently approved collection.

Agency: Mine Safety and Health Administration.

OMB Number: 1219-0030.

Affected Public: Business or other for-profit.

Number of Respondents: 6.

Frequency: On occasion.

Number of Responses: 5,940.

Annual Burden Hours: 2,046 hours.

Annual Respondent or Recordkeeper Cost: \$2,400.

Comments submitted in response to this notice will be summarized and included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Roslyn B. Fontaine,
Certifying Officer.

SUPPLEMENTARY INFORMATION:

I. Background

Under 30 CFR parts 7 and 15, MSHA evaluates and approves explosive materials and blasting units as permissible for use in mines. However, some underground metal and nonmetal Category III mines (gassy mines) use non-approved explosive materials or blasting units because there are no permissible explosive materials and blasting units.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection related to Explosive Materials and Blasting Units. MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the

Agency, including whether the information has practical utility;

- Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and

- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

The information collection request will be available on <http://www.regulations.gov>. MSHA cautions the commenter against providing any information in the submission that should not be publicly disclosed. Full comments, including personal information provided, will be made available on www.regulations.gov and www.reginfo.gov.
