

unless, prior to that time, VA determines that such comments are no longer needed and notifies the ACHP, in writing, or the ACHP withdraws the Program Comment in accordance with 36 CFR 800.14(e)(6). Following such withdrawal, VA will again be required to comply with Section 106 through the process in 36 CFR 800.3–800.7, or an applicable program alternative under 36 CFR 800.14, for each individual undertaking formerly covered by this Program Comment.

During the first six months of the ninth year since issuance of this Program Comment, VA and the ACHP will meet to determine whether to consider an extension to its term. Such an extension would need to be pursued through an amendment, as detailed below.

10. Amendment

The ACHP may amend this Program Comment after consulting with VA, and other parties as appropriate. The ACHP will publish notice in the **Federal Register** to that effect within 30 days after its decision to amend this Program Comment.

SUPPLEMENTARY INFORMATION:

Public Participation and Request for Comments

This Notice relies on the authority of the Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended. An

ICR is an application to OIRA seeking the approval, extension, or renewal of a Coast Guard collection of information (Collection). The ICR contains information describing the Collection's purpose, the Collection's likely burden on the affected public, an explanation of the necessity of the Collection, and other important information describing the Collection. There is one ICR for each Collection.

The Coast Guard invites comments on whether this ICR should be granted based on the Collection being necessary for the proper performance of Departmental functions. In particular, the Coast Guard would appreciate comments addressing: (1) The practical utility of the Collection; (2) the accuracy of the estimated burden of the Collection; (3) ways to enhance the quality, utility, and clarity of information subject to the Collection; and (4) ways to minimize the burden of the Collection on respondents, including the use of automated collection techniques or other forms of information technology. These comments will help OIRA determine whether to approve the ICR referred to in this Notice.

We encourage you to respond to this request by submitting comments and related materials. Comments to Coast Guard or OIRA must contain the OMB Control Number of the ICR. They must also contain the docket number of this request, [USCG-2014-0713], and must be received by November 26, 2018.

Previous Request for Comments

This request provides a 30-day comment period required by OIRA. The Coast Guard published the 60-day Notice (81 FR 85987, November 29, 2016) required by 44 U.S.C. 3506(c)(2). The Coast Guard previously published a 60-day Notice for this ICR on October 7, 2014 (79 FR 60483). The comments from that Notice were addressed in the latest 60-day Notice (81 FR 85987), November 29, 2016). The present 60-day Notice elicited several questions from a single commenter.

Comment (1) A commenter questioned the Coast Guard's response to previously submitted comment (6) in which the Coast Guard noted a reduced reporting burden with the revised form. The commenter noted that the burden is not reduced since collecting aspects of vessels such as hull material and engine type are already required under 33 CFR 174 even if statistics regarding these aspects are not required on form CGHQ-3923.

Answer: The burden of filling out the revised form is reduced. On the previous version of CGHQ-3923, the Coast Guard required statistics on over 150 data points whereas the proposed version of the form requires only 69. The previous version requested information on five variables (vessel type, hull material, length, engine type and use) whereas the proposed version requires only three variables (vessel type, length, primary operation). The Coast Guard expects a reduced burden as the proposed form will require fewer queries and fewer data point checks to complete it.

Comment (2) A commenter questioned why aspects of vessels such as hull material and engine type are necessary in 33 CFR 174 since they are not required elements to be reported on form CGHQ-3923.

Answer: Various aspects of vessels are required to be collected for law enforcement purposes. Even though various vessel aspects such as hull material and engine type are not on the proposed form CGHQ-3923, they are used in accident, theft, and fraud investigations. Using common

terminology facilitates common understanding.

Comment (3) A commenter noted that hull material and engine type are of interest to sectors and should be on form CGHQ-3923 since information on them cannot be obtained outside of CGHQ-3923.

Answer: The Coast Guard works with various sectors including government, industry, non-profits, and researchers. If a party requested information other than what is available on CGHQ-3923, the Coast Guard would direct the user to a more appropriate contact.

Comment (4) A commenter provided a recommended version of CGHQ-3923 that is a medication of the previous CGHQ-3923. It includes additional hull material entries, an additional engine type, and changes the names of some categories.

Answer: The Coast Guard thanks the commenter for the suggested form but maintains a desire to have a simplified form for use by the States. The Coast Guard has not used the hull material or engine information collected previously. Because we have not used the data, we removed it from the form so as to reduce the burden of data reporting on the States.
