8. Current Roster Members and Prior Applicants

Current members of the Chapter 19 roster who remain interested in inclusion on the Chapter 19 roster only need to indicate that they are reapplying and submit updates (if any) to their applications on file. Current members do not need to resubmit their applications. Individuals who have previously applied but have not been selected must submit new applications to reapply. If an applicant, including a current or former roster member, has previously submitted materials referred to in item 9, such materials need not be resubmitted.

9. Public Disclosure

Applications are covered by a Privacy Act System of Records Notice and are not subject to public disclosure and will not be posted publicly on www.regulations.gov. They may be referred to other federal agencies and Congressional committees in the course of determining eligibility for the roster, and shared with foreign governments and the NAFTA Secretariat in the course of panel selection.

10. False Statements

Pursuant to section 402(c)(5) of the NAFTA Implementation Act, false statements by applicants regarding their personal or professional qualifications, or financial or other relevant interests that bear on the applicants’ suitability for placement on the Chapter 19 roster or for appointment to binational panels, are subject to criminal sanctions under 18 U.S.C. 1001.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket No. FRA–2018–0091]

Approval of BNSF Railway Company Test Program To Evaluate Automated Track Inspection Technologies

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of approval.

SUMMARY: FRA is issuing this notice to explain its rationale for approving a BNSF Railway Company (BNSF) Test Program designed to evaluate the effectiveness of various types of automated track inspection technologies and for granting a limited, temporary suspension of one Federal railroad safety requirement necessary to facilitate the conduct of the Test Program.

FOR FURTHER INFORMATION CONTACT: Yu-Jiang Zhang, Staff Director, Track Division, Office of Railroad Safety, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590, telephone (202) 493–6460 or email yujiang.zhang@dot.gov; Aaron Moore, Attorney, Office of Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590, telephone (202) 493–7009 or email aaron.moore@dot.gov.

SUPPLEMENTARY INFORMATION: On July 31, 2018, BNSF petitioned FRA under Title 49 of the United States Code, Subtitle A, Chapter 211, Part 213 (49 CFR 213.233(c) as necessary to carry out the Test Program. As required by 49 CFR 211.51(c), FRA is providing this explanatory statement describing the Test Program.

The Test Program specifies that the pilot program will be conducted on approximately 1,348 miles of main and siding tracks from Lincoln, Nebraska and Donkey Creek, Wyoming and back to Lincoln, Nebraska via BNSF’s coal loop excluding the Orin Subdivision. Specifically, the Test Territory includes the following track segments spanning seven subdivisions of BNSF’s Powder River Subdivision:

1. Ravenna (Milepost (MP) 11.082 to MP 128.2); 2. Sand Hills (MP 128.2 to MP 364.1); 3. Butte (MP 364.1 to MP 476.1); 4. Black Hills (MP 476.1 to MP 586.286); 5. Canyon (MP 90.4 to MP 133.2); 6. Valley (MP 0.00 to 90.4); and 7. Angora (MP 33.826 to MP 0.3).

The Test Program explains that tonnage over the Test Territory varies by subdivision from 105 million gross tons (MGT) to 198 MGT and that the primary traffic over the Test Territory is coal traffic. Further, BNSF indicates that 55 percent of the lines in the Test Territory are concrete and 45 percent are wood, with 520 control points, 292 bridges and 598 turnouts included within the territory.

The Test Program is designed to test the use of manned and unmanned track geometry cars for track inspection as a viable alternative to manual visual inspections and to implement and test an optical visual platform to supplement manual visual inspections. The Test Program will be carried out in four separate phases over the course of one year as detailed in Table 1 below:

<table>
<thead>
<tr>
<th>Phase</th>
<th>Days</th>
<th>Inspection</th>
<th>Metric</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>1–60</td>
<td>Maintain current manual visual inspection frequency; Target of approximately weekly geometry car frequency; Joint BNSF/FRA “baseline” manual field inspection</td>
<td>Below 2014 baseline for: 1. Unprotected Red tags/100 miles = 6.95.</td>
</tr>
<tr>
<td>2</td>
<td>61–120</td>
<td>Weekly mandated manual visual main line inspections; monthly sidings; Target of approximately weekly mainline geometry car frequency; monthly sidings; ATIP Inspection near end of phase 2</td>
<td>Reduction from baseline: 1. Unprotected Red tags/100 miles = 5.0 or below measured quarterly (28% reduction).</td>
</tr>
</tbody>
</table>

5 On October 24, 2018, in response to a request from BNSF, FRA modified the conditions of its September 26, 2018 approval.
FRA approved the Test Program and granted BNSF’s petition for a temporary suspension of 49 CFR 213.233(c) subject to certain conditions designed to ensure the safety of the Test Program. Among those conditions, BNSF must demonstrate to FRA how it will implement the “data driven focused manual visual inspections” in Phases 3 and 4 of the Test Program and the railroad must meet the metrics specified in the Test Program to monitor and measure the effectiveness of the technologies being tested. If those metrics cannot be met in any phase of the program, BNSF must revise the Test Program. A copy of FRA’s letters approving BNSF’s Test Program and granting the requested limited, temporary suspension of 49 CFR 213.233(c) is available in the public docket at www.regulations.gov (docket no. FRA–2018–0083).

FRA finds that the temporary, limited suspension of 49 CFR 213.233(c) is necessary to the conduct of the approved Test Program which is specifically designed to evaluate the effectiveness of various types of automated track inspection technologies. FRA also finds that the scope and application of the granted suspension of 49 CFR 213.233(c) as applied to the Test Program is limited to that necessary to facilitate the conduct of the Test Program.

Robert C. Lauby, Associate Administrator for Railroad Safety
Chief Safety Officer.

Federal Railroad Administration
[Docket Number FRA–2018–0083]

Petition for Waiver of Compliance

Under part 211 of Title 49 Code of Federal Regulations (CFR), this document provides the public notice that on October 4, 2018, the BNSF Railway Company (BNSF), petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR 225.25, Recordkeeping. FRA assigned the petition Docket Number FRA–2018–0083.

Specifically, BNSF seeks a waiver of compliance from 49 CFR 225.25(h) which states, in part, “Except as provided in paragraph (h)(15) of this section, a listing of all injuries and occupational illnesses reported to FRA as having occurred at an establishment shall be posted in a conspicuous location at that establishment, within 30 days after the expiration of the month during which the injuries and illnesses occurred, if the establishment has been in continual operation for a minimum of 90 calendar days.”

BNSF requests a waiver regarding the actual posting of the monthly listing of employee reportable injuries, occupational illnesses, and fatalities, as reported to FRA that have occurred during the past 12-month period at each establishment. In lieu of physically posting a “paper” copy of the monthly listing at each establishment, BNSF has developed an electronic version that would be available to its employees by accessing this information on computer terminals located at company facilities and personal devices. BNSF would place posters on the notice boards at each establishment indicating that the monthly listings are available to be viewed in two ways: electronically through access from a computer terminal, or through direct request of a manager.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov and in person at the U.S. Department of Transportation’s (DOT) Docket Operations Facility, 1200 New Jersey Avenue SE, W12–140, Washington, DC 20590. The Docket Operations Facility is open from 9 a.m. to 5 p.m., Monday through Friday, except Federal Holidays.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested parties desire an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted by any of the following methods:

- Website: http://www.regulations.gov. Follow the online instructions for submitting comments.
- Hand Delivery: 1200 New Jersey Avenue SE, Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.
