DEPARTMENT OF JUSTICE

Notice of Lodging of Agreed Modification to Consent Decree Under the Clean Water Act

On October 30, 2018, the Department of Justice lodged an Agreed Modification to Consent Decree with the United States District Court for the Central District of Illinois in the lawsuit entitled *United States v. City of Rock Island, Illinois*, Civil Action No. 4:00–CV–04076–JBM. The original Consent Decree in this case was approved and entered by the Court in 2003 (the “2003 Consent Decree”).

The 2003 Consent Decree resolved alleged violations of the Clean Water Act associated with untreated discharges from the City of Rock Island's municipal wastewater treatment and sewer system. Under the 2003 Consent Decree, Rock Island committed to make an array of engineering improvements to its wastewater treatment plant and sewer system, with input and oversight from the U.S. Environmental Protection Agency (“EPA”). The Agreed Modification to Consent Decree would memorialize agreed deadline extensions for two sewer system improvement projects addressing wastewater discharge points designated as Outfall 006 and Outfall 007. The Outfall 006 project was slated for completion in January 2018, but the parties to the 2003 Consent Decree agreed to extend that deadline until August 2018. The Outfall 007 project was originally scheduled for construction completion in April 2016 and operational startup in October 2016, but the parties agreed to extend those deadlines until June 2018, and August 2018, respectively. Rock Island met the extended deadlines for both projects. EPA has determined that the delays at issue were due to circumstances beyond Rock Island's control, as described in detail in the Agreed Modification.

The publication of this notice is intended mainly to inform the public of these agreed deadline extensions, but it also opens a period for public comment on the Agreed Modification. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States v. City of Rock Island, Illinois*, D.J. Ref. No. 90–5–1–1–

SUPPLEMENTARY INFORMATION: This ICR seeks approval under the PRA for revisions to the Occupational Safety and Health Onsite Consultation Agreements information collection. The OSHA Onsite Consultation Service Program offers free and confidential advice to small and medium-sized businesses in all States across the country, with priority given to high-hazard worksites. The requirements specified in the Onsite Consultation regulations for cooperative agreements, 29 CFR part 1908, are necessary to ensure uniform delivery of onsite consultation services nationwide. The regulatory procedures specify the activities carried out by State Onsite Consultation Programs funded by the Federal government, as well as the responsibilities of employers who receive onsite consultation services. This information collection has been classified as a revision, because the OSHA is making minor edits to the Safety and Health Program Assessment Worksheet, Form OSHA-33, that reflect new terminology and revised requirements associated with the revised 2012 OSHA Hazard Communication Standard, 29 CFR 1910.1200. Occupational Safety and Health Act of 1970 sections 7(c)(1) and 21(c) authorize this information collection. See 29 U.S.C. 656(c)(1) and 670(c).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition,

notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1218-0110. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. New requirements would only take effect upon OMB approval. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on March 30, 2018 (83 FR 13792).

Interested parties are encouraged to send comments to the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1218-0110. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.
