[Docket No. FSIS-2018-0043]

Changes to the Salmonella and Campylobacter Verification Testing Program: Revised Categorization and Follow-Up Sampling Procedures

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: The Food Safety and Inspection Service (FSIS) is announcing and requesting comments on revised categorization and follow-up sampling procedures relative to pathogen reduction performance standards. FSIS will proceed with web-posting individual establishments' category status for pathogen reduction performance standards for *Salmonella* in raw chicken parts and not-ready-to-eat (NRTE) comminuted chicken and turkey, as previously announced, and updating individual poultry carcass establishments' category status in November. However, the category status reported will be based on FSIS sample results during the 52-week window ending the last Saturday of the previous month, rather than on results during the last 13 completed 52-week windows. At the same time, FSIS will no longer include follow-up sampling results as part of the moving window when determining establishment category status. Finally, FSIS will update the individual establishments' category status on its website on a monthly basis and will maintain the last six months of historical establishment-specific categorization data on the website, as it becomes available, using the revised categorization procedures announced in this notice.

FSIS intends to use the revised categorization procedures for all establishments subject to a pathogen reduction performance standard for *Salmonella* or *Campylobacter*, including
