Abstract: Reclamation is responsible for approximately 6.5 million acres of land which directly support Reclamation's Federal water projects in the 17 Western States. Under Title 43 CFR part 429, individuals or entities wanting to use Reclamation's lands, facilities, or waterbodies must apply using Form 7–2540. Examples of such uses are:

—Agricultural uses such as grazing and farming;

- commercial or organized recreation and sporting activities;
- other commercial activities such as “guiding and outfitting” and “filming and photography;” and,
- resource exploration and extraction, including sand and gravel removal and timber harvesting.

We review applications to determine whether granting individual use authorizations are compatible with Reclamation’s present or future uses of the lands, facilities, or waterbodies. When we find a proposed use compatible, we advise the applicant of the estimated administrative costs and estimated application processing time. In addition to the administrative costs, we require the applicant to pay a use fee based on a valuation or by competitive bidding. If the application is for construction of a bridge, building, or other significant construction project, Reclamation may require that all plans and specifications be signed and sealed by a licensed professional engineer.

Background: In his letter of October 26, 2018, the USTR requested that the Commission provide certain advice under section 131 of the Trade Act of 1974 (19 U.S.C. 2151) and an assessment under section 105(a)(2)(B)(i)(III) of the Bipartisan Congressional Trade Priorities and Accountability Act of 2015 (19 U.S.C. 4204(a)(2)(B)(i)(III)) with respect to the effects of providing duty-free treatment for imports of products from Japan.

More specifically, the USTR, under authority delegated by the President and pursuant to section 131 of the Trade Act of 1974, requested that the Commission provide a report containing its advice as to the probable economic effect of providing duty-free treatment for imports of currently dutiable products from Japan on (i) industries in the United States producing like or directly competitive products, and (ii) consumers. The USTR asked that the Commission’s analysis consider each article in chapters 1 through 97 of the *Harmonized Tariff Schedule of the United States* (HTS) for which U.S. tariffs will remain, taking into account implementation of U.S. commitments in the World Trade Organization. The USTR asked that the advice be based on the HTS in effect during 2018 and trade data for 2017.

In addition, the USTR requested that the Commission prepare an assessment, as described in section 105(a)(2)(B)(i)(III) of the Bipartisan Congressional Trade Priorities and Accountability Act of 2015, of the probable economic effects of eliminating tariffs on imports from Japan of those agricultural products described in the list attached to the USTR’s request letter on (i) industries in the United States producing the products concerned, and (ii) the U.S. economy as a whole. The USTR’s request letter and list of agricultural products are posted on the Commission’s website at <http://www.usitc.gov>.

As requested, the Commission will provide its report to the USTR as soon as possible. The USTR indicated that those sections of the Commission’s report that relate to the advice and assessment of probable economic effects will be classified. The USTR also indicated that he considers the
