

the Commission may be required to withhold from disclosure certain information about the location, character, or ownership of a historic property, including traditional religious sites.

Needs and Uses: The Commission will submit this collection as revision to the currently approved collection. The Commission is slightly revising the electronic form to include five additional data elements, FCC Registration Number, Call Sign, Antenna Registration Number, Facility ID and File Number. Today customers are asked to include this information as part of their narrative description and often neglect to include all the necessary information to process their request. This results in customer services representatives needing to contact the customers to obtain the additional details, which slows down case resolution. We do not anticipate these changes will impact the customer burden, since they will only need to include the information applicable to their request, and it was previously requested as part of the description field. There will be no change to the estimated average burden (hours and costs) or the number of respondents.

The FCC's maintains internet software used by the public to apply for licenses, participate in auctions for spectrum, and maintain license information. In this mission, FCC has a 'help desk' that answers questions related to these systems as well as resetting and/or issuing user passwords for access to these systems. The form currently is available on the website <https://esupport.fcc.gov/request.htm> under OMB Control Number 3060-1042. This form will continue to substantially decrease public and staff burden since all the information needed to facilitate a support request will be submitted in a standard format but be available to a wider audience. This eliminates or at least minimizes the need to follow-up with the customers to obtain all the information necessary to respond to their request. This form also helps presort requests into previously defined categories to all staff to respond more quickly.
