**SUPPLEMENTARY INFORMATION:** The Bureau of Land Management, Federal Aviation Administration, and United States Fish and Wildlife Service are federal cooperating agencies for this EIS. Additional state and county cooperating agencies include: Nevada Department of Wildlife, Nevada Division of Minerals, Nevada Department of Agriculture, Nevada Department of Transportation, Nevada Governor's Office of Energy, Churchill County, Eureka County, Lander County, Mineral County, Nye County, and Pershing County. The DoN is also working with thirteen federally recognized Native American tribes and one Tribal Council.

The FRTC is a training complex in the high desert of northern Nevada encompassing airspace, land ranges, and electronic systems used primarily for air and ground training activities. The DoN's proposed action is to modernize the FRTC by expanding land ranges and modifying associated airspace configurations. The proposed action has the following elements:

- Congressional renewal of the 1999 public land withdrawal of 202,864 acres which is scheduled to expire in November 2021.
- Withdrawal and reservation by Congress for military use of up to approximately 618,727 acres of additional federal land.
- Acquisition of approximately 65,153 acres of private or state-owned (non-federal) land.
- Expansion of associated special use airspace and reconfiguration of existing airspace.
- Modification of range infrastructure to support modernization, including construction of new targets.

The purpose of the proposed action is to provide sustainable and modernized airspace, range, maneuver areas, training facilities, and range infrastructure and resources that would support acceptably realistic air warfare training activities as well as special operations ground training activities in order to meet emergent and future threats. The proposed action would enable the DoN's execution of its congressionally mandated roles and responsibilities under 10 United States Code (U.S.C.), section 5062 and 10 U.S.C. 167. Current range configurations do not support realistic training.

Increasing the size of the range would allow the DoN to realistically train with precision-guided munitions, which require greater safety buffer zones because they are launched from aircraft at higher altitudes and longer distances from targets. It would also allow ground forces to realistically conduct tactical ground mobility training.
