

and air quality planning documents for meeting other federal requirements.

*Form Numbers:* None.

*Respondents/affected entities:* Entities potentially affected by this action are metropolitan planning organizations (MPOs), state departments of transportation, local transit agencies, and state and local air quality agencies. Federal agencies potentially affected by this action include FHWA, FTA, and EPA.

*Respondent's obligation to respond:* Mandatory pursuant to Clean Air Act section 176(c) (42 U.S.C. 7506(c)) and 40 CFR parts 51 and 93.

*Estimated number of respondents:* EPA estimates that 109 MPOs will be subject to transportation conformity requirements during the period covered by this ICR and that EPA Regional Offices, the FHWA, and FTA will be involved in interagency consultation, and review of transportation-related conformity determinations performed by MPOs during this process. EPA also estimates that similar consultation will occur for projects in isolated rural areas.

*Frequency of response:* The information collections described in this ICR must be completed before a transportation plan, TIP, or project conformity determination is made. The Clean Air Act requires conformity to be determined for transportation plans and TIPs every four years. Conformity determinations on projects in metropolitan and isolated rural areas are required on an as-needed basis.

*Total estimated burden:* 35,344 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$2,247,525 (per year), includes zero annualized capital or operation and maintenance costs.

*Changes in estimates:* There is a decrease of 15,214 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to less burden associated with decreased conformity analyses for PM<sub>10</sub>, CO, 1997 PM<sub>2.5</sub>, and NO<sub>2</sub> NAAQS and a decrease in burden over the previous ICR for reduced emissions model transition and training burden.
