

that request. The Department also sent a letter to Arizona, dated November 16, 2017, asking whether the State wished to supplement or update its request. Arizona responded in a letter dated November 27, 2017. The Department, on December 27, 2017, published a second notice in the **Federal Register**, 82 FR 61329, which advised the public that the State had submitted additional information and provided additional time for public comment.

Following the receipt of public comments, the Department sent a letter dated June 29, 2018, to Arizona requesting that the State provide answers to a number of questions that had arisen during the Department's review of the comments, and inviting response to any other matters raised in the comments. This notice advises the public that the State of Arizona submitted additional information in response, in a letter dated October 16, 2018, and solicits public comment on that supplemental information. The correspondence with Arizona, including its letter of October 16, 2018, may be viewed at <https://www.justice.gov/olp/pending-requests-final-decisions>.

Following the Department's transmission of its letter of June 29, 2018 to Arizona, and again following Arizona's transmission of its responsive letter of October 16, 2018 to the Department, a commenter on Arizona's request for certification requested that the Department provide an opportunity for additional public comment to allow response to the new information in Arizona's letter. This notice provides an opportunity for such public comment.

Dated: November 13, 2018.

Beth A. Williams,

Assistant Attorney General.

SUPPLEMENTARY INFORMATION: Effective September 30, 2018, the NRC and the WYDEQ (collectively referred to as the Agencies) entered into a MOU for the purpose of establishing a regulatory process for the completion of decommissioning of five uranium mill tailing sites and the termination of the associated uranium mill licenses located within the State of Wyoming. This MOU pertains to the Agencies' roles in the decommissioning and eventual termination of the license for the following five uranium mill sites:

1. Anadarko Bear Creek located in Converse County, Wyoming (NRC License No. SUA-1310, Docket No. 040-08452)
2. Pathfinder Lucky Mc located in Fremont County, Wyoming (NRC License No. SUA-672, Docket No. 040-02259)
3. Western Nuclear Split Rock located approximately 2 miles from Jeffrey City, Wyoming (NRC License SUA-56, Docket No. 040-01162)
4. Umetco Minerals Corporation Gas Hills East located in Natrona, County Wyoming (NRC License No. SUA-648, Docket No. 040-00299)
5. ExxonMobil Highlands located approximately 25 miles north of Douglas, Wyoming (NRC License No. SUA-1139, Docket No. 040-08102)

The five licenses were transferred to the State of Wyoming on September 30, 2018, when the NRC discontinued, and the State of Wyoming assumed, regulatory authority over the management and disposal of byproduct material as defined in 11e.(2) of the Atomic Energy Act of 1954, as amended (the Act), and a subcategory of source material or ores involved in the extraction or concentration of uranium or thorium milling in the State in accordance with the agreement authorized by Section 274b. of the Act (83 FR 48905; September 28, 2018). The MOU documents completed NRC actions related to the decommissioning process for each of the sites and

delineates specific actions, on a site-by-site basis, that the NRC and the State of Wyoming will take to verify completion of the decommissioning and license termination for these sites. The MOU stipulates that any decision made by the NRC for the five uranium mill sites prior to the discontinuation of the NRC's regulatory authority in Wyoming will be appropriately recognized by the NRC as meeting all applicable standards and requirements when reviewing the Completion Review Report. A Completion Review Report is required to be submitted by the State of Wyoming to the NRC, prior to license termination of a uranium mill site, for review and approval to adequately ensure public health and safety. Upon termination of each license, the site may be transferred, customarily, to the U.S. Department of Energy for long-term care and surveillance.

The NRC and WYDEQ will cooperate fully with each other to carry out this MOU and its intent of ensuring protection of public health, safety, and the environment in accordance with all governing laws and regulations.

Dated at Rockville, Maryland, this 15th day of November, 2018.

For the Nuclear Regulatory Commission.
