SUPPLEMENTARY INFORMATION: In
accordance with the Paperwork
Reduction Act of 1995, we provide the
general public and other Federal
agencies with an opportunity to
comment on new, proposed, revised,
and continuing collections of
information. This helps us assess the
impact of our information collection
requirements and minimize the public's
reporting burden. It also helps the
public understand our information
collection requirements and provide the
requested data in the desired format.

A **Federal Register** notice with a 60-
day public comment period soliciting
comments on this collection of
information was published on February
28, 2018 (83 FR 8698). The following
comments were received:

Comment 1: Letter dated April 30,
2018, from Myles P. Culhane, Assistant
General Counsel, Occidental Petroleum
Corporation. Received via email on
April 30, 2018.

Occidental Petroleum Corporation
provided comments on whether PECE is
necessary to the proper functions of the
Service, whether we will use the
information in a timely manner, and
how to enhance the information being
collected. They stated that PECE is very
important to encourage voluntary
conservation efforts prior to listing
decisions such that listing may not be
necessary. They offered three
suggestions to improve information
collection in the context of specific
listing decisions:

(1) Ensure that we are collecting the
right types of information by
considering what will be useful in
predicting future conservation actions
and results, and articulating the factors
we think will inform such predictions,
(2) Ensure that we have the ability to
update our listing decisions up until the
last minute regarding current
information about conservation efforts, and

(3) Ensure that PECE analyses are
cumulative and include all qualifying
conservation efforts together rather than
in isolation.

FWS Response to Comment 1: The
Service appreciates this comment and
does consider the best available

scientific and commercial information
received through the public comment
period, information solicitation, or other
means related to conservation efforts
when making listing determinations.
The Service maintains that in every
proposed or final listing decision, we
articulate the species' needs, the threats
to the species and its response to those
threats, and any actions that may
ameliorate or exacerbate those threats.
Each particular situation is unique, but
in the Service's final PECE, we
articulated the non-exhaustive list of
criteria that we would use to evaluate
each conservation effort that did not
have a track record of implementation
or effectiveness. The Service is required
to consider best available scientific and
commercial information in making
listing decisions, including information
on conservation efforts that do not have
a track record of implementation or
effectiveness. The Service evaluates the
certainty of implementation and
effectiveness by considering the criteria
in the PECE, and those efforts that meet
the PECE standard of sufficiently certain
to be implemented and effective are
then evaluated in the status assessment
for the species. The Service understands
that stakeholders want a transparent and
flexible process, and the Service is open
to communication and collaboration
with these stakeholders which will
encourage conservation of species.

Comment 2: Letter dated April 27,
2018, from Steve Wright, General
Manager, Public Utility District No. 1 of
Chelan County, WA. Received via email
on May, 7, 2018.

Chelan Public Utility District No. 1
commented that it finds PECE useful
because it encourages aggregation of
information about conservation efforts,
which can provide notice to permit
applicants and other entities possibly
affected by a listing, both of the listing
and the efforts. It can also encourage
entities to participate in conservation
efforts, which can be meaningful for
species. It finds that encouraging
conservation efforts is consistent with
the ESA and benefits species.

FWS Response to Comment 2: The
Service appreciates the District's
comments about the utility and benefits
of PECE.

We are again soliciting comments on
the proposed ICR that is described
below. We are especially interested in
public comment addressing the
following issues: (1) Is the collection
necessary to the proper functions of the
Service; (2) will this information be
processed and used in a timely manner;
(3) is the estimate of burden accurate;
(4) how might the Service enhance the
quality, utility, and clarity of the

information to be collected; and (5) how might the Service minimize the burden of this collection on the respondents, including through the use of information technology.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: Section 4 of the Endangered Species Act (ESA; 16 U.S.C. 1531 *et seq.*) outlines the process by which we can list a species as a threatened species or an endangered species. When we consider whether to list a species, the ESA requires us to take into account the efforts made by any State or any political subdivision of a State to protect such species. We also take into account the efforts made by other entities. States or other entities often formalize conservation efforts in conservation agreements, conservation plans, management plans, or similar documents. The conservation efforts recommended or described in such documents could prevent some species from becoming so imperiled that they meet the definition of a threatened

species or an endangered species under the ESA.

The Policy for Evaluation of Conservation Efforts When Making Listing Decisions (PECE) (68 FR 15100, March 28, 2003) encourages the development of conservation agreements or plans and provides certainty about the standard that an individual conservation effort must meet in order for us to consider whether it is likely to make a difference in a species' status. PECE applies to "formalized conservation efforts" that have not been implemented or have been implemented but have not yet demonstrated if they are effective at the time of a listing decision.

Under PECE, formalized conservation efforts are defined as conservation efforts (specific actions, activities, or programs designed to eliminate or reduce threats or otherwise improve the status of a species) identified in a conservation agreement, conservation plan, management plan, or similar document. To assist us in evaluating a formalized conservation effort under PECE, we collect information such as conservation plans, monitoring results, and progress reports. The development of any agreement or plan is voluntary. There is no requirement that the individual conservation efforts included in such documents be designed to meet the standard in PECE. The PECE policy is posted on our Candidate Conservation website at <http://www.fws.gov/endangered/esa-library/pdf/PECE-final.pdf>.

We are not reporting an increase in burden with this renewal, although we revised the collection to include burden for individuals, businesses, and not-for-profit organizations who may develop agreements/plans or may agree to implement certain conservation efforts identified in a State agreement or plan. Previously, we reported all burden estimates as government, although it was possible to receive submissions from individuals and private sector respondents. This submission breaks their burden out separately, with a placeholder of one submission for each category, to account for the rare occasion that we may receive a submission from these additional respondent categories.
