SUPPLEMENTARY INFORMATION: Under the Homeland Security Presidential Directive-19: Combating Terrorist Use of Explosives in the United States, DHS was mandated to have a regularly updated assessment of domestic explosives-related capabilities. It required DHS to expand its National Capabilities Analysis Database, which is now known as the National Counter-Improvised Explosive Device Capabilities Analysis Database (NCCAD). Currently, the President’s Policy Directive-17: Countering Improvised Explosive Devices (PPD-17) reaffirms the 2007 Strategy for Combating Terrorist Use of Explosives in the United States. It provides guidance to update and gives momentum to our ability to counter threats involving improvised explosive devices (IEDs).

The NCCAD provides State, local, tribal and territorial law enforcement stakeholders a method to identify their level of capability to prevent, protect, mitigate, and respond to an IED threat. It also provides Federal stakeholders an overarching view of the Nation’s collective counter-IED capabilities.

Information is collected by Office for Bombing Prevention (OBP) personnel and contractors. These individuals travel to locations across the Nation to gather the requisite information. OBP personnel and contractors facilitate initial baseline assessments either face-to-face or via webinar in order to get stakeholders familiar with the NCCAD system, provide clarifying information, and answer questions. Federal, State, local, tribal, and territorial law enforcement personnel with a counter-IED mission assist NCCAD personnel to coordinate a training location for personnel from the four disciplines (bomb squads, explosives detection canine, special weapons and tactics teams (SWAT), and dive units) to take their respective assessment. The OBP facilitator begins by conducting a short brief on the reasons for NCCAD and how it can help them as units.

The NCCAD assessments consists of a total of 56 tasks bundled into specific question sets spread across the four (4) disciplines representing specific tasks encompassing personnel, training, and equipment. The OBP and the NCCAD team used federal requirements (FEMA Resource Typing) to create the overarching list of questions in the question sets. Where there were no requirements, OBP and NCCAD worked with subject matter experts to identify best practices to create the assessments. Subject matter experts and Federal, State, local agency representatives collaborated to rank and stack each question and question set in order of importance and priority. At that time, weights were assigned to the questions, which provide the capability calculation for the whole question set.

The first group of questions in the assessment focus on the profile of the unit, *i.e.*, the number of technicians/handlers; primary assignment versus collateral duty assignment; number of IED responses in the past twelve (12) months; number of special events in the past twelve (12) months. The rest of question sets are delineated by task: Implement Intelligence/Information Gathering and Dissemination; Implement Bombing Incident Prevention and Response Plans; Incident Analysis; Incident Mitigation; Access Threat Area; Contain or Mitigate Hazards; Conduct Scene Investigations; and Maintain Readiness.

Each discipline’s questionnaire only includes question sets specific to that discipline. This means that while multiple disciplines may have the same question set title, the questions may not be the same. For example, the SWAT and canine questionnaires both have the question set, Maintain Readiness,
