SUPPLEMENTARY INFORMATION: PHMSA received a special permit request from Gulf South Pipeline Company, LP, (“GSPC”) to deviate from the pipeline safety regulations in 49 CFR 192.611, for four segments totaling 4.65 miles, of 30-inch diameter Index 130 pipeline,

located in Ascension and Livingston Parishes, Louisiana, where the class location has changed from a Class 1 to Class 3 location. In lieu of pipe replacement, GSPC seeks permission to perform alternative risk control activities based on integrity management program principles and requirements. Due to class location changes from a Class 1 to Class 3 in the 1990s, GSPC lowered the maximum allowable operating pressure as required by § 192.611, from 936 pounds per square inch gauge (psig) to 780 psig. However, GSPC now seeks to update the line to restore the previous MAOP, using Subpart K of § 192.555.

The special permit request provided by the operator includes a draft environmental assessment, (EA), proposed special permit conditions, and location map. These documents are filed at <http://www.Regulations.gov>, in Docket No. PHMSA–2018–0099. We invite interested persons to participate by reviewing the special permit documents and draft EA at <http://www.Regulations.gov>, and by submitting written comments, data or other views. Please include any comments on potential safety and environmental impacts that may result if the special permit is granted.

Before issuing a decision on the special permit request, PHMSA will evaluate all comments received on or before the comment closing date. Comments received after the comment closing date will be evaluated if it is possible to do so without incurring additional expense or delay. PHMSA will consider each relevant comment we receive in making our decision to grant or deny a request.

Issued in Washington, DC on November 29, 2018, under authority delegated in 49 CFR 1.97.

Deputy Associate Administrator for Field Operations.

Section 46.6(c)(2) provides that the board of directors of the covered institution shall approve and review these policies and procedures no less than annually and provide the board of directors and senior management with a summary of the stress test results.

Section 46.7 provides that each covered institution shall report to the OCC and to the Board of Governors of the Federal Reserve System annually the results of the stress test in the time, manner and form specified by the OCC.

Section 46.8 requires that a covered institution publish a summary of the results of its annual stress tests on its website or in any other forum that is reasonably accessible to the public. The summary must include a description of the types of risks included in the stress test, a summary description of the methodologies used in the stress test, estimates of aggregate losses, pre-provision net revenue, provisions for loan and lease losses, net income, and pro forma capital ratios and an explanation of the most significant causes of the changes in regulatory capital ratios. The summary also must reflect, for estimates of aggregate losses, pre-provision net revenue, provisions for loan and lease losses, the estimated cumulative effects and estimated capital ratios, net income, and pro forma capital ratios (including regulatory and any other capital ratios specified by the OCC) at the end of the planning horizon, under the severely adverse scenario.
