Abstract: The Bird Banding Program is the responsibility of the U.S. Geological Survey (USGS) Bird Banding Laboratory (BBL). The BBL has a critical role in storing and maintaining data on banded and marked birds, particularly to facilitate coordination between banders and people who later encounter the marked birds, and to ensure the data are available for later analyses.

To achieve these goals, the BBL collects information using three forms: (1) The Application for Federal Bird Banding or Marking Permit, (2) The Federal Bird Banding or Marking Permit Renewal Form, and (3) The Bird Banding Recovery Report.

We will protect information from respondents considered proprietary under the Freedom of Information Act (5 U.S.C. 552) and its implementing regulations (43 CFR part 2), and under regulations at 30 CFR 250.197, “Data and information to be made available to the public or for limited inspection.” Responses are voluntary. No questions of a “sensitive” nature are asked.
