AGENCY: National Institutes of Health, HHS.

ACTION: Notice; request for comments.

SUMMARY: The National Institutes of Health (NIH) is seeking input on the draft report by the 21st Century Cures Act Working Group on Reducing Administrative Burden to Researchers for Animal Care and Use in Research. The draft report is a coordinated effort of the Director of the National Institutes of Health, in collaboration with the Secretary of Agriculture and the Commissioner of Food and Drugs. It describes the proposed actions that the working group has identified to reduce administrative burden on investigators while maintaining the integrity and credibility of research findings and protection of research animals.

DATES: The Request for Information regarding the proposed actions that the working group has identified is open for public comment for a period of 60 days. Comments must be submitted electronically at <https://grants.nih.gov/grants/rfi/rfi.cfm?ID=83> and must be received by February 5, 2019 to ensure consideration.

FOR FURTHER INFORMATION CONTACT: Patricia Brown, Office of Laboratory Animal Welfare (OLAW), Office of Extramural Research, National Institutes of Health, Suite 2500, 6700B Rockledge Drive, Bethesda, MD 20892-6910, phone: 301-496-7163, email: olaw@od.nih.gov.

SUPPLEMENTARY INFORMATION:

I. Background

This request for information is a coordinated effort of the Director of the National Institutes of Health, in

collaboration with the Secretary of Agriculture and the Commissioner of Food and Drugs, to seek input on the draft report by the 21st Century Cures Act, Section 2034(d) Working Group on Reducing Administrative Burden to Researchers for Animal Care and Use in Research.

Section 2034(d) of the 21st Century Cures Act (Pub. L. 114-255) was enacted December 13, 2016 and requires that the NIH, in collaboration with the United States Department of Agriculture (USDA) and the Food and Drug Administration (FDA), complete a review of applicable regulations and policies for the care and use of laboratory animals and make revisions to reduce administrative burden on investigators. NIH OLAW, USDA, and FDA formed a Working Group to: (1) Identify overlapping regulations and policies; (2) take steps to reduce such identified regulations and policies; and (3) take actions to improve coordination, as directed by the U.S. Congress. Input is sought on the draft report of the Working Group and others within the federal government and the proposed recommendations to reduce the administrative burden associated with research activities with laboratory animals while maintaining appropriate protections and scientific integrity. The draft report is available at https://olaw.nih.gov/sites/default/files/21CCA_draft_report.pdf.

Dated: November 16, 2018.

SUPPLEMENTARY INFORMATION:

Proposed Action: The proposed action is approval of the construction and operation of a wind energy facility as described in the COP submitted by Vineyard Wind on Lease Area OCS-A 0501. The COP proposes to construct, operate, maintain, and eventually decommission an up to 800 MW wind energy facility on the OCS offshore Massachusetts within the proposed Project area. Vineyard Wind's COP proposes installing up to 100 wind turbine generators, each with a capacity of between 8 and 10 MW. Foundations would be 100 monopiles or up to 10 jacket foundations and the remainder monopiles. The proposed facility would also include one or two offshore substations or electrical service platforms. The Vineyard Wind COP also proposes an export cable from the wind energy facility to shore that would occur within the range of design parameters outlined in the COP. Vineyard Wind has identified two potential export cable landfalls: One near the town of Yarmouth and one near the town of Barnstable, both in the Commonwealth of Massachusetts. Onshore construction and staging would take place at the New Bedford Marine Commerce Terminal facility. At its nearest point, the project area is approximately 12 nautical miles from the southeast corner of Martha's Vineyard and a similar distance from the southwest side of Nantucket. The turbines would be located in water depths ranging from approximately 37

to 49 meters (approximately 121 to 161 feet).

Alternatives: In preparing the Draft EIS and in consideration of scoping comments, BOEM conducted an initial evaluation of a full range of alternatives. BOEM eliminated from further consideration alternatives that were technically or economically infeasible, did not provide environmental benefits, or otherwise did not meet BOEM's purpose and need. BOEM's Draft EIS carries forward for full evaluation a reasonable range of alternatives to the proposed action. The alternatives include the proposed action, a different cable landfall location, a reduction in project size, several options for modified wind turbine layouts, and a no-action alternative to disapprove the COP. This Draft EIS analyzes each alternative in detail, including direct, indirect, and cumulative environmental effects. The Draft EIS also considers proposed mitigation measures that BOEM may select. Compliance with existing laws and regulations by Vineyard Wind and BOEM may require additional measures or modifications to the measures described in the Draft EIS.

Once BOEM completes the Final EIS and associated consultations, BOEM will decide whether to approve, approve with modification, or disapprove the Vineyard Wind COP. If BOEM approves the COP and the proposed facility is constructed, the lessee must submit a plan to decommission the facilities before the lease term ends.

Availability of the Draft EIS: The Draft EIS, Vineyard Wind COP, and associated information are available on BOEM's website at: <https://www.boem.gov/Vineyard-Wind/>. BOEM will distribute digital copies of the Draft EIS to interested parties upon request. If you require a paper copy, BOEM will provide one upon request, as long as copies are available. You may request a CD, paper copy, or the location of a library with a paper copy of the Draft EIS by calling (703) 787-1346.

Cooperating Agencies: On March 30, 2018, BOEM published in the **Federal Register** a Notice of Intent to prepare the Draft EIS. Nine agencies are participating as cooperating agencies in the preparation of the Draft EIS: The Bureau of Safety and Environmental Enforcement, the U.S. Environmental Protection Agency, the National Oceanic and Atmospheric Administration, the U.S. Army Corps of Engineers, the U.S. Coast Guard, the Massachusetts Office of Coastal Zone Management, the Rhode Island Department of Environmental Management, the Rhode Island Coastal Resource Management Council, and the Narragansett Indian Tribe.

BOEM does not consider anonymous comments. Please include your name and address as part of your submittal. BOEM makes all comments, including the name and addresses of respondents, available for public review during regular business hours. Individual respondents may request that BOEM withhold their names or addresses from the public record; however, BOEM cannot guarantee that it will be able to do so. If you wish your name or address to be withheld, you must state your preference prominently at the beginning of your comment. All submissions from organizations or businesses and from individuals identifying themselves as representatives or officials of organizations or businesses will be made available for public inspection in their entirety.

Authority: This NOA was prepared pursuant to NEPA and implementing regulations at 40 CFR 1506.6 and 43 CFR 46.435.

Dated: December 3, 2018.

Chief Environmental Officer, Bureau of Ocean Energy Management.
