DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP18-506-000]

Portland Natural Gas Transmission System; Notice of Availability of the Environmental Assessment for the Proposed Portland Xpress Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the Portland Xpress Project (Project), proposed by Portland Natural Gas Transmission System (PNGTS) in the above-referenced docket. The Project is designed to provide 24,375 million cubic feet per day (Mcf/d) to PNGTS owned facilities, and 22,339 Mcf/d on PNGTS and Maritimes & Northeast Pipeline, LLC (Maritimes) jointly owned facilities. PNGTS also requests approval to abandon 7,185 Mcf/d of existing interim capacity from Maritimes. The Project includes modifications to existing facilities in Cumberland and York Counties, Maine, and Middlesex County, Massachusetts.

The EA assesses the potential environmental effects of the construction and operation of the Project in accordance with the requirements of the National Environmental Policy Act (NEPA). The FERC staff concludes that approval of the Project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The proposed Project includes the following facilities:

Westbrook Compressor Station (CS), Cumberland County, Maine

- Install a new electrical control building with motor control center, emergency generator building and generator and ancillary equipment.

Eliot CS, York County, Maine

- Expansion of the existing building to include one new 6,300 horsepower (hp) gas-fired compression unit and ancillary equipment; and
