#### Background

On February 27, 2018, the Postal Service published a proposed rule, **Federal Register** Notice (83 FR 8399) *Proposed Changes to Validations for IMpb* to announce its proposal to add new IMpb compliance validations for Barcode Quality (BQ), Address Quality (AQ), and (Shipping Services File) Manifest Quality (MQ) metrics. The proposed rule also reflected IMpb threshold increases for Barcode Quality and (Shipping Services File) Manifest Quality. In addition, the Postal Service provided notice to work in partnership

with the mailing industry to determine the percentage increase for Address Quality threshold.

On September 21, 2018, the Postal Service published a final rule, **Federal Register** Notice (83 FR 47839) *Changes to Validations for IMpb* to amend mailing standards, to add new IMpb compliance quality validations and thresholds for Address Quality, Barcode Quality, and (Shipping Services File) Manifest Quality.

Additional time was needed to discuss the validation requirements for Address Quality before increasing the AQ threshold. The Postal Service and mailing industry have agreed on 90% as the new AQ threshold. The new AQ threshold is effective January 31, 2019, and the assessment of the IMpb Noncompliance Fee pursuant to this new AQ threshold will begin on February 1, 2019. Additionally, the Address Quality (AQ) validation “*valid primary street number*” will be removed from the measurement.

The Postal Service adopts the following changes to *Mailing Standards of the United States Postal Service, Domestic Mail Manual (DMM)*, incorporated by reference in the *Code of Federal Regulations*. See 39 CFR 111.1.

**ENVIRONMENTAL PROTECTION AGENCY**

**40 CFR Part 52**

[EPA–R10–OAR–2018–0022; FRL–9987–60–Region 10]

**Air Plan Approval; Oregon; Removal of Obsolete Regulations**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** The Environmental Protection Agency (EPA) is approving the removal of outdated rules in the Code of Federal Regulations (CFR) for the State of Oregon because they are duplicative or obsolete. Removal of such material from the air program subparts is designed to improve cost effectiveness and usability of the CFR. The EPA is also approving non-substantive revisions to reflect updated citations and correcting a typographical error. This final action makes no substantive changes to the Oregon State Implementation Plan and imposes no new requirements.

**DATES:** This action is effective on January 10, 2019.

**ADDRESSES:** The EPA has established a docket for this action under Docket ID No. EPA–R10–OAR–2018–0022. All documents in the docket are listed on the <https://www.regulations.gov>

website. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available at <https://www.regulations.gov>, or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information.

**FOR FURTHER INFORMATION CONTACT:** Christi Duboiski, EPA Region 10, at (360) 753–9081, or [duboiski.christi@epa.gov](mailto:duboiski.christi@epa.gov).

**SUPPLEMENTARY INFORMATION:**

Throughout this document, wherever “we”, “us” or “our” is used, it is intended to refer to the EPA.

**I. Background**

This action is being taken pursuant to Executive Order 13563—*Improving Regulation and Regulatory Review*. It is intended to reduce the number of pages in the Code of Federal Regulations (CFR) by identifying those rules in 40 CFR part 52, subpart MM, for the State of Oregon that are duplicative or obsolete. This action removes historical information and rules that no longer have any use or legal effect because they have been superseded by subsequently approved state implementation plan (SIP) revisions or they are no longer necessary because the EPA previously promulgated administrative rule actions to replace these sections with summary tables in 40 CFR 52.1970 (78 FR 74012, December 10, 2013). On October 10, 2010, the EPA proposed to approve these changes and received no comments on our proposed rulemaking (83 FR 50867).

**II. Final Action**

This final action is a “housekeeping” exercise that removes duplicative or obsolete CFR provisions and corrects a non-substantive typographical error. The EPA is approving the removal of 40 CFR 52.1973, 40 CFR 52.1974 paragraphs (b) and (c), 40 CFR 52.1977, and 40 CFR 52.1982; and approving the amendment to 40 CFR 52.1974(a). The EPA is removing the duplicative or obsolete rules because they have been revised or superseded by subsequently approved SIP revisions. These actions make no substantive changes to the SIP. The changes will be accurately reflected in 40 CFR part 52, subpart MM for the State of Oregon.
