

stock washer can be neither technically nor economically feasible to control.

In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance with 40 CFR part 60, subpart BB.

Form numbers: None.

Respondents/affected entities: Kraft pulp mills.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart BB).

Estimated number of respondents: 97 (total).

Frequency of response: Initially, occasionally and semiannually.

Total estimated burden: 13,900 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$5,020,000 (per year), which includes \$3,510,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the estimates: There is an adjustment decrease in the estimated burden and cost as currently identified in the OMB Inventory of Approved Burdens. The decrease is not due to any program changes. The change in burden is due to an industry decline since the last ICR renewal, resulting in a decrease in the number of respondent subject to the standard.

Courtney Kerwin,

Director, Regulatory Support Division.

Clean Air Act Prevention of Significant Deterioration Permit Issued to Palmdale Energy LLC for the Palmdale Energy Project

AGENCY: Environmental Protection Agency.

ACTION: Notice of final action.

SUMMARY: This notice announces that the Environmental Protection Agency, Region IX (EPA Region IX) issued a final permit decision to Palmdale Energy, LLC for a Clean Air Act Prevention of Significant Deterioration (PSD) permit for the construction of the Palmdale Energy Project (PEP).

DATES: The final PSD permit decision for the PEP was issued and became effective on October 25, 2018. Pursuant to section 307(b)(1) of the Clean Air Act, judicial review of this final permit decision, to the extent it is available, may be sought by filing a petition for review in the United States Court of Appeals for the Ninth Circuit within 60 days of December 11, 2018.

ADDRESSES: The EPA established a docket for this action under Docket ID No. EPA-R09-OAR-2017-0473. All documents in the docket are listed on the <https://www.regulations.gov> website. Although listed in the docket index, some information is not publicly available, e.g., Confidential Business Information (CBI) or other information the disclosure of which is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through <http://www.regulations.gov>. Please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional information about accessing docket materials for this action.

FOR FURTHER INFORMATION CONTACT: Lisa Beckham, Permits Office (Air-3), U.S. Environmental Protection Agency, Region IX, (415) 972-3811, beckham.lisa@epa.gov. Anyone who wishes to review the EPA's Environmental Appeals Board (EAB) decision described below or documents in the EAB's electronic docket for its decision can obtain them at <http://www.epa.gov/eab/>. The final PSD permit is available in the electronic docket for this action at <http://www.regulations.gov> (Docket ID: EPA-R09-OAR-2017-0473).

SUPPLEMENTARY INFORMATION:

Notice of Final Action

On April 25, 2018, EPA Region IX initially issued PSD Permit No. SE 17-01 to Palmdale Energy, LLC under 40 CFR 124.15, authorizing the construction and operation of the PEP. By its own terms, and consistent with 40 CFR 124.15(b), the effective date of the permit was delayed as the result of the filing of a petition for review of the Region's permit decision with the EAB.

On October 23, 2018, the EAB denied review of the permit decision. *See In re Palmdale Energy LLC*, PSD Appeal No. 18-01 (EAB Oct. 23, 2018), 17 E.A.D. ____ (Order Denying Review). Following the EAB's action, pursuant to 40 CFR 124.19(l)(2), EPA Region IX issued a final permit decision on October 25, 2018. All conditions of the PEP PSD

permit, as initially issued by EPA Region IX on April 25, 2018, were final and effective as of October 25, 2018.

Dated: November 13, 2018.

Elizabeth J. Adams,

Division Director, Region IX.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Ferroalloys Production: Ferromanganese and Silicomanganese (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NESHAP for Ferroalloys Production: Ferromanganese and Silicomanganese (EPA ICR No. 1831.07, OMB Control No. 2060-0391), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through December 31, 2018. Public comments were previously requested, via the **Federal Register**, on June 29, 2017 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before January 10, 2019.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OECA-2014-0066, to: (1) EPA online using www.regulations.gov (our preferred method), or by email to docket.oeca@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460; and (2) OMB via email to oira_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public

docket without change, including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 564-2970; fax number: (202) 564-0050; email address: yellin.patrick@epa.gov.

SUPPLEMENTARY INFORMATION: Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

Abstract: The NESHAP for Ferroalloys Production: Ferromanganese and Silicomanganese applies to new and existing ferroalloy production facilities that manufacture ferromanganese and silicomanganese, and that are either major sources of hazardous air pollutant (HAP) emissions or are co-located at major sources of HAPs. The following affected facilities at ferroalloy production plants are subject to this NESHAP rule: Submerged arc furnaces; metal oxygen refining processes; crushing and screening operations; and fugitive dust sources. New facilities include those that commenced construction or reconstruction after the date of proposal.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance with 40 CFR part 63, subpart XXX.

Form numbers: None.

Respondents/affected entities: Ferroalloy production facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart XXX).

Estimated number of respondents: 2 (total).

Frequency of response: Initially, quarterly, semiannually, and annually.

Total estimated burden: 1,170 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$133,000 (per year); there are no annualized capital/startup and operation & maintenance costs.

Changes in the estimates: There is an increase in the total estimated respondent burden compared with the ICR currently-approved by OMB. The adjustment increase in burden is due to more accurate estimates of existing and anticipated new sources, as identified during the development of the final rule amendments.

Courtney Kerwin,

Director, Regulatory Support Division.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Pesticide Active Ingredient Production (40 CFR part 63, subpart MMM) apply to existing and new facilities engaged in the production of pesticide active ingredients (PAIs) that emit HAPs. New facilities include those that commenced construction, modification or reconstruction after the date of proposal.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining
