Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Coal- and Oil-Fired Electric Utility Steam Generating Units (40 CFR part 63, subpart UUUUU) apply to each individual or group of two or more new, reconstructed, or existing electric utility steam generating units (EGUs) within a contiguous area and under common control. An EGU is defined as a fossil fuel-fired combustion unit of more than 25 megawatts electric (MWe) that serves a generator that produces electricity for sale, or a fossil fuel-fired unit that cogenerates steam and electricity and supplies more than one-third of its potential electric output capacity and more than 25 MWe output to any utility power distribution system for sale. New facilities include those that commenced construction or reconstruction after the date of proposal.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an

affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance with 40 CFR part 63, subpart UUUUU.

Form numbers: None.

Respondents/affected entities: Owners and operators of coal- and oil-fired EGUs.

Respondent's obligation to respond: Mandatory (40 CFR 63, Subpart UUUUU).

Estimated number of respondents: 322 (total).

Frequency of response: Initially, occasionally, and semiannually.

Total estimated burden: 284,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$132,000,000 (per year), which includes \$104,000,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the estimates: There is an adjustment decrease in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This change is not due to any program changes. The overall decrease in the burden and cost estimates occurred due to more accurate estimates of existing and anticipated new sources. Additionally, there is an adjustment increase in the capital/start-up and O&M costs from the previous ICR. The prior ICR inadvertently removed O&M costs for existing sources, while this ICR reincorporates O&M costs for existing respondents.

Director, Regulatory Support Division.

Abstract: The New Source Performance Standards (NSPS) for Municipal Waste Combustors apply to existing and new facilities with a

municipal waste combustor unit capacity greater than 225 megagrams per day of municipal solid waste. In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance with 40 CFR part 60, subparts Ea and Eb.

Form numbers: None.

Respondents/affected entities:

Owners and operators of municipal waste combustor (MWC) facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subparts Ea and Eb).

Estimated number of respondents: 23.

Frequency of response: Initially, quarterly and semiannually.

Total estimated burden: 34,900 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$3,440,000 (per year), which includes \$226,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the estimates: There is an increase in the respondent burdens from the most recent ICR. The adjustments are due to a change in the number of sources subject to each Subpart, which was revised to reflect more recent information obtained through the Agency's research within the MWC sector.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is seeking public comment on a petition from the Center for Food Safety (CFS) requesting that the Agency revise testing requirements for pesticides prior to registration. The petitioner, CFS, requests that the

Agency require testing for whole pesticide formulations to account for the toxicological effects of inert and adjuvant ingredients and the testing of tank mixes to assess the interaction between pesticide ingredients. CSF believes this change is needed to meet the applicable safety standards of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA).

DATES: Comments must be received on or before March 21, 2019.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA-HQ-OPP-2018-0262, by one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW, Washington, DC 20460-0001.

If you have any questions regarding the applicability of this action to a particular entity, consult the person

listed under **FOR FURTHER INFORMATION CONTACT**.

II. What action is the agency taking?

EPA requests public comment on a petition received from CFS requesting EPA take the following actions:

1. Revise pesticide registration regulations to take into account all pesticide ingredients (active, inert and adjuvant) and their effects on the environment.
2. Revise pesticide registration regulations to require whole pesticide formulation and tank mixture testing to take into account synergistic effects.
3. Revise pesticide registration regulations to require inert ingredients and whole pesticide formulations testing for chronic toxicological effects and degradation.
4. Revise pesticide registration regulations to require Endangered Species Act (ESA) consultation on the effects of whole pesticide formulations and tank mixtures on threatened and endangered species.
5. Comply with the above requirements in conducting statutorily mandated registration reviews of pesticides.

III. What should I consider as I prepare my comments for EPA?

Do not submit this information to EPA through [regulations.gov](http://www.regulations.gov) or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.
