SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains under the control of the ISMHS, Indianapolis, IN. The human remains were removed from the southern shore of Hamilton Lake, Steuben County, IN.

The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains and associated funerary objects. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by staff at the University of Indianapolis, for the Indiana State Museum and Historic Sites Corporation. Following identification of the human remains as Native American, consultation proceeded with representatives of the Citizen Potawatomi Nation, Oklahoma; Delaware Nation, Oklahoma; Forest County Potawatomi Community, Wisconsin; Hannahville Indian Community, Michigan; Match-e-be-nash-she-wish Band of Pottawatomi Indians of Michigan; Miami Tribe of Oklahoma; Nottawaseppi Huron Band of the Potawatomi, Michigan (previously listed as the Huron Potawatomi, Inc.); and the Pokagon Band of Potawatomi Indians, Michigan and Indiana, hereafter referred to as "The Tribes."

History and Description of the Remains

On August 16, 2014, human remains were observed by members of the public at the shoreline of Hamilton Lake, Steuben County, Indiana. The local police department was immediately contacted, and transported the human remains to the Angola Fire Department for assessment by the coroner.

Following notice of the discovery to Indiana Conservation officers, scuba divers from S.C.U.R.R.T. and the Steuben County Sheriff's Department were dispatched to search for additional human remains; none were found. Indiana Conservation officers, in turn, contacted forensic specialists from the University of Indianapolis, who advised that the remains were human and possibly Native American.

As the human remains were not a part of a recent crime scene and following consultation with the Indiana

Department of Historic Preservation and Archaeology, the human remains were transported by Indiana Conservation officers to the Indiana State Museum and Historic Sites (ISMHS) on August 18, 2014. Subsequently, staff from the University of Indianapolis further assessed the human remains, and identified them as Native American.

The human remains were inventoried, and an osteological analysis was conducted by staff at the University of Indianapolis. They identified the human remains, which consist of a portion of the skull, as belonging to a single adult female. Given the incomplete nature of the skeletal material little information was possible with regard to pathology, cause of death, or specific age.

Based on witness interviews conducted by Indiana Conservation officers, the human remains were found directly adjacent to areas frequented by recreational water implements and vehicles. As divers recovered no additional human remains, these human remains likely originated from a disturbed context elsewhere in the lake or adjacent areas. No other materials were recovered. No associated funerary objects are present.
