

such products freed Agency resources to focus on evaluating formulations whose toxicity was less well characterized, or was of higher toxicity.

In a 2015 Final Rule (80 FR 80653; December 28, 2015), the Agency reorganized the ingredients lists and added specific chemical identifiers to clarify to manufacturers, the public, and Federal, state, and tribal inspectors the specific chemical substances that are permitted in minimum risk pesticide products. EPA also modified the label requirements to require the use of specific label display names of ingredients and to require producer contact information on the label. The primary goal of this rulemaking was to clarify the conditions of exemption for minimum risk pesticides by clarifying the specific ingredients that are permitted in minimum risk pesticide products and to provide company contact information on the label. The previous version of this ICR covered the paperwork burdens associated with existing products updating their labels to comply with the new requirements during the 2015 Final Rule's compliance period. EPA anticipates that those burdens have been realized, and is now accounting for the potential burden for new products coming into the market.

Respondents/Affected Entities: Individuals or entities engaged in activities related to the manufacturing of minimum risk pesticide products.

Respondent's obligation to respond: Required to obtain or retain a benefit (FIFRA sections 3 and 25; 40 CFR 152.25(f)).

Estimated total number of potential respondents: 49.

Frequency of response: On occasion.

Estimated total burden: 479 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Estimated total costs: \$52,202 (per year), includes no annualized capital investment or maintenance and operational costs.

Changes in the estimates: There is a decrease of 4,933.5 hours in the total 3-year estimated respondent burden compared with the ICR currently approved by OMB. This decrease reflects a reduction in the number of labels that need to be updated per year from 386 to 87. This change is considered an adjustment.

Director, Regulatory Support Division.
