Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection is contained in 47 U.S.C. 154, 222, 303, 309 and 332.

Total Annual Burden: 2,606 hours.

Annual Cost Burden: \$19,138,350.

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information. The information to be collected will be made available for public inspection.

Applicants may request materials or information submitted to the Commission be given confidential treatment under 47 CFR 0.459 of the Commission's rules.

Needs and Uses: Part 22 contains the technical and legal requirements for radio stations operating in the Public Mobile Services. The information collected is used to determine, on a case-by-case basis, whether or not to grant licenses authorizing construction and operation of wireless telecommunications facilities to common carriers. Further, this information is used to develop statistics about the demand for various wireless licenses and/or the licensing process itself, and occasionally for rule enforcement purposes.

The Federal Communications Commission (Commission) received approval for a revision of OMB Control No. 3060-0508 from the Office of Management and Budget (OMB). The revised information collection reflects deletion of a rule applicable to all licensees and applicants governed by part 22 of the Commission's rules, as adopted by the Commission in a *Third Report and Order* on July 12, 2018 (WT Docket Nos. 12-40 and 16-138; RM Nos. 11510 and 11660; FCC 19-82). The *Third Report and Order* deleted certain part 22 rules that either imposed administrative and recordkeeping burdens that are outdated and no longer serve the public interest, or that are

largely duplicative of later-adopted rules and are thus no longer necessary. Among the rule deletions and of relevance to this information collection, the Commission deleted rule § 22.303, resulting in discontinued information collection for that rule section.

Needs and Uses: The Commission is not requesting that the respondents submit confidential information to the FCC. Respondents may, however, request confidential treatment for information they believe to be confidential under 47 CFR 0.459 of the Commission's rules.

Needs and Uses: Section 251 of the Communications Act of 1934, as amended, 47 U.S.C. 251, is designed to accelerate private sector development and deployment of telecommunications technologies and services by spurring competition. Section 222(e) is also designed to spur competition by prescribing requirements for the sharing of subscriber list information. These information collection requirements are designed to help implement certain provisions of sections 222(e) and 251, and to eliminate operational barriers to competition in the telecommunications services market. Specifically, these information collection requirements will be used to implement (1) local exchange carriers' ("LECs") obligations to provide their competitors with dialing parity and non-discriminatory access to certain services and functionalities; (2) incumbent local exchange carriers' ("ILECs") duty to make network information disclosures; and (3) numbering administration. The revisions to this collection relate to changes in one of many components of the currently approved collection—specifically, certain reporting, recordkeeping and/or third-party disclosure requirements under section 251(c)(5). In November 2017, the Commission adopted new rules concerning certain information collection requirements implemented under section 251(c)(5) of the Act, pertaining to network change disclosures. Most of the changes to those rules applied specifically to a

certain subset of network change disclosures, namely notices of planned copper retirements. In addition, the changes removed a rule that prohibits incumbent LECs from engaging in useful advanced coordination with entities affected by network changes. In June 2018, the Commission revised its network change disclosure rules to (1) revise the types of network changes that trigger an incumbent LEC's public notice obligation, and (2) extend the *force majeure* provisions applicable to copper retirements to all types of network changes. The changes are aimed at removing unnecessary regulatory barriers to the deployment of high-speed broadband networks. The Commission estimates that these revisions do not result in any change to the total annual burden hours or any additional outlays of funds for hiring outside contractors or procuring equipment as the changes eliminate notices that are subsumed by notice obligations that remain in force or simply codify procedures available to a small number of incumbent LECs by waiver orders.
