Abstract: FedTalent is the Department of the Interior's (DOI) shared services system to maintain and validate training records, manage class rosters and transcripts for course administrators and the student or training recipient, meet Federal mandatory training and statistical reporting requirements, and manage other programmatic functions related to training and educational programs.

DOI collects personal information from students in order to communicate training opportunities, manage course registration and delivery, validate training records necessary for certification or granting of college credit, process billing information for training classes, and to meet Federal training reporting requirements. Information may also be collected to comply with the Americans with Disabilities Act requirements to address

facilities accommodations. Training and learning records are maintained in DOI's web-based learning management system, and bureau and office systems and locations where training programs are managed. DOI bureau's offer training programs which extend to external customers; such as Universities, State governments, local governments and not-for-profit organizations and in some cases private citizens.

Each year approximately 3,000 external users request to register for training offered by DOI bureau's and offices through FedTalent. Each registration will require approximately 3 minutes. Upon deployment in the Fall 2018, *FedTalent* will:

- Create an authoritative system of record for all training completions,
- Offer a more flexible approach for external training requests and documentation (Forms SF-182),
- Create a learning environment that encourages engagement on multiple levels,
- Improve the supervisory approval workflow for external requests (Forms SF-182),
- Enhance training delivery options, and
- Create opportunities to offer world-class instruction and to engage directly with learners through discussion forums and communities of practice.
