is available on the NRC’s public Web site at https://www.nrc.gov/site-help/e-submittals.html.

Once a participant has obtained a digital ID certificate and a docket has been created, the participant can then submit a request for hearing or petition for leave to intervene through the EIE System. Submissions should be in Portable Document Format (PDF) in accordance with NRC guidance available on the NRC public Web site at https://www.nrc.gov/site-help/e-submittals.html. A filing is considered complete at the time the documents are submitted through the NRC’s E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. Eastern Time on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an e-mail notice confirming receipt of the document. The E-Filing system also distributes an e-mail notice that provides access to the document to the NRC Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the documents on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before a hearing request/petition to intervene is filed so that they can obtain access to the document via the E-Filing system.

A person filing electronically using the agency’s adjudicatory E-Filing system may seek assistance by contacting the NRC Electronic Filing Help Desk through the “Contact Us” link located on the NRC Web site at https://www.nrc.gov/site-help/e-submittals.html, by e-mail at MSHD.Resource@nrc.gov, or by a toll-free call at (866) 672–7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 6 p.m., Eastern Time, Monday through Friday, excluding government holidays. Participants who believe that they have a good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted by: (1) first class mail addressed to the Office of the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001. Attention: Rulemaking and Adjudications Staff; or (2) courier, express mail, or expedited delivery service to the Office of the Secretary, Sixteenth Floor, One White Flint North, 11555 Rockville Pike, Rockville, Maryland, 20852. Attention: Rulemaking and Adjudications Staff. Participants filing a document in this manner are responsible for serving the document on all other participants. Filing is considered complete by first-class mail as of the time of deposit in the mail, or by courier, express mail, or expedited delivery service upon depositing the document with the provider of the service. A presiding officer, having granted an exemption request from using E-Filing, may require a participant or party to use E-Filing if the presiding officer subsequently determines that the reason for granting the exemption from use of E-Filing no longer exists.

Documents submitted in adjudicatory proceedings will appear in NRC’s electronic hearing dockets which are available to the public at https://adams.nrc.gov/ehd//, unless excluded pursuant to an order of the Commission, or the presiding officer. Participants are requested not to include personal privacy information, such as social security numbers, home addresses, or home phone numbers in their filings, unless an NRC regulation or other law requires submission of such information. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants are requested not to include copyrighted materials in their submission.

If a person (other than SNC) requests a hearing, that person shall set forth with particularity the manner in which his interest is adversely affected, the Commission will issue an order designating the time and place of any hearing. If a hearing is held, the issue to be considered at such hearing shall be whether this CO should be sustained.

In the absence of any request for hearing, or written approval of an extension of time in which to request a hearing, the provisions specified in Section V above shall be final 30 days from the date of this CO without further order or proceedings. If an extension of time for requesting a hearing has been approved, the provisions specified in Section V shall be final when the extension expires if a hearing request has not been received.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–382; NRC–2016–0078]

Entergy Operations, Inc.; Waterford Steam Electric Station, Unit 3

AGENCY: Nuclear Regulatory Commission.

ACTION: License renewal and record of decision; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has issued Renewed Facility Operating License No. NPF–38 to Entergy Operations, Inc., (EOI), the operator of the Waterford Steam Electric Station, Unit 3 (WF3), and Entergy Louisiana, LLC, the owner of WF3 (together Entergy or the licensees). Renewed Facility Operating License No. NPF–38 authorizes EOI to operate WF3 at reactor core power levels not in excess of 3,716 megawatts thermal, in accordance with the provisions of the WF3 renewed license and technical specifications. In addition, the NRC has prepared a record of decision (ROD) that supports the NRC’s decision to renew Facility Operating License No. NPF–38.

DATES: The NRC issued the Renewed Facility Operating License No. NPF–38 on December 27, 2018.

ADDRESSES: Please refer to Docket ID NRC–2016–0078 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

• Federal Rulemaking Website: Go to http://www.regulations.gov and search for Docket ID NRC–2016–0078. Address questions about Docket IDs in Regulations.gov to Krupskaya Castellon; telephone: 301–287–9221; email: Krupskaya.Castellon@nrc.gov. For technical questions, contact the individual listed in the FOR FURTHER INFORMATION CONTACT section of this document.

• NRC’s Agencywide Documents Access and Management System (ADAMS): You may obtain publiclyavailable documents online in the ADAMS Public Documents collection at http://www.nrc.gov/reading-rm/ adams.html. To begin the search, select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1–800–397–4209, 301–
Regarding Waterford Steam Electric Station, Unit 3 (WF3), and Entergy Louisiana, LLC (together Entergy or the licensees), Renewed Facility Operating License No. NPF–38 authorizes Entergy to operate WF3 at reactor core power levels not in excess of 3,716 megawatts thermal, in accordance with the provisions of the WF3 renewed license and technical specifications. The NRC’s record of decision that supports the decision to issue Renewed Facility Operating License No. NPF–38 is available in ADAMS under Accession No. ML18275A234. The NRC documented its environmental review for the license renewal in the record of decision and in the final supplemental environmental impact statement (FSEIS), which was published as Supplement 59, “Regarding Waterford Steam Electric Station, Unit 3, Final Report,” November 20, 2018 (ADAMS Accession No. ML18323A103), to NUREG–1437, “Generic Environmental Impact Statement for License Renewal of Nuclear Plants.” As part of its environmental review, the NRC considered a range of reasonable alternatives to WF3 license renewal that included new nuclear power generation, supercritical pulverized coal (SCPC), natural gas combined-cycle (NGCC), and a combination alternative (NGCC, biomass, and demand-side management (DSM)). The NRC also considered the no-action alternative, or simply not issuing the renewed license. The FSEIS documents the environmental review, including the determination that the adverse environmental impacts of license renewal for WF3 are not so great that preserving the option of license renewal for energy planning decisionmakers would be unreasonable. WF3 is a pressurized-water reactor located in Killona, St. Charles Parish, Louisiana (25 miles west of New Orleans, LA). The application for the renewed license, “License Renewal Application, Waterford Steam Electric Station, Unit 3 Facility Operating License MPF–38, March 2016,” dated March 23, 2016 (ADAMS Package Accession No. ML16088A324), as supplemented by letters dated through June 26, 2018, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the NRC’s regulations. As required by the Act and the NRC’s regulations in chapter 1 of title 10 of the Code of Federal Regulations (10 CFR), the NRC has made appropriate findings, which it has set forth in the renewed license. The NRC published a public notice of the proposed issuance of the renewed license, which included an opportunity for a hearing, in the Federal Register on May 31, 2016 (81 FR 34379). No adjudicatory matters are pending before the Commission or the Atomic Safety and Licensing Board Panel regarding the WF3 license renewal application.

For further details with respect to this action, see: (1) Entergy’s license renewal application for WF3 dated March 23, 2016 (ADAMS Package Accession No. ML16088A324), as supplemented by letters through June 26, 2018, (2) the NRC’s safety evaluation report published on August 17, 2018 (ADAMS Accession No. ML18228A668), (3) the NRC’s final supplemental environmental impact statement (NUREG–1437, Supplement 59) for WF3 published on November 20, 2018 (ADAMS Accession No. ML18323A103), and (4) the NRC’s record of decision (ADAMS Accession No. ML18275A234).

II. Conclusion

As discussed in Chapter 5 of the final supplemental environmental impact statement for the WF3 license renewal (Supplement 59 to NUREG–1437), the NRC has determined that the adverse environmental impacts of license renewal for WF3 are not so great that preserving the option of license renewal for energy-planning decisionmakers would be unreasonable. This recommendation is based on: (1) The analysis and findings in the Generic Environmental Impact Statement for License Renewal of Nuclear Plants, (2) information provided in the environment report submitted by Entergy, (3) consultation with Federal, State, local, and Tribal agencies, and (4) the NRC’s independent environmental review.

Dated at Rockville, Maryland, this 28th day of January 2019.

Joseph E. Donoghue,
Deputy Director, Division of Materials and License Renewal, Office of Nuclear Reactor Regulation.

OFFICE OF PERSONNEL
MANAGEMENT

Submission for Renewal of a Previously Approved Information Collection: Interview Survey Form, INV 10

AGENCY: Office of Personnel Management.

ACTION: 60-day notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the National Background Investigations Bureau (NBIB), Office of Personnel Management (OPM) proposes to request the Office of Management and Budget (OMB) to renew a previously-approved information collection, Interview Survey Form, INV 10.

DATES: Comments are encouraged and will be accepted until April 2, 2019.

This process is conducted in accordance with 5 CFR 1320.8(d)(1).

ADDRESSES: You may submit comments, identified by docket number and title, by the following method:

All submissions received must include the agency name and docket number for this document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing at http://www.regulations.gov as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: A copy of this ICR, with applicable supporting documentation, may be obtained by contacting the National Background Investigations Bureau, U.S. Office of Personnel Management, 1900 E Street NW, Washington, DC 20415. Attention: Donna McLeod or sent by email to FISFormsComments@opm.gov.

SUPPLEMENTARY INFORMATION: OPM is soliciting comments for this collection as required by the Paperwork Reduction

415–4737, or by email to pdr.resource@nrc.gov. For the convenience of the reader, instructions about obtaining materials referenced in this document are provided in the “Availability of Documents” section.

• NRC’s PDR: You may examine and purchase copies of public documents at the NRC’s PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

SUPPLEMENTARY INFORMATION:

I. Introduction

Notice is hereby given that the NRC has issued Renewed Facility Operating License No. NPF–38 to Entergy Operations, Inc. (EOI), the operator of Waterford Steam Electric Station, Unit 3 (WF3), and Entergy Louisiana, LLC (together Entergy or the licensees), Renewed Facility Operating License No. NPF–38 authorizes EOI to operate WF3 at reactor core power levels not in excess of 3,716 megawatts thermal, in accordance with the provisions of the WF3 renewed license and technical specifications. The NRC’s record of decision that supports the decision to issue Renewed Facility Operating License No. NPF–38 is available in ADAMS under Accession No. ML18275A234. The NRC documented its environmental review for the license renewal in the record of decision and in the final supplemental environmental impact statement (FSEIS), which was published as Supplement 59, “Regarding Waterford Steam Electric Station, Unit 3, Final Report,” November 20, 2018 (ADAMS Accession No. ML18323A103), to NUREG–1437, “Generic Environmental Impact Statement for License Renewal of Nuclear Plants.” As part of its environmental review, the NRC considered a range of reasonable alternatives to WF3 license renewal that included new nuclear power generation, supercritical pulverized coal (SCPC), natural gas combined-cycle (NGCC), and a combination alternative (NGCC, biomass, and demand-side management (DSM)). The NRC also considered the no-action alternative, or simply not issuing the renewed license. The FSEIS documents the environmental review, including the determination that the adverse environmental impacts of license renewal for WF3 are not so great that preserving the option of license renewal for energy planning decisionmakers would be unreasonable.

WF3 is a pressurized-water reactor located in Killona, St. Charles Parish, Louisiana (25 miles west of New Orleans, LA). The application for the renewed license, “License Renewal Application, Waterford Steam Electric Station, Unit 3 Facility Operating License MPF–38, March 2016,” dated March 23, 2016 (ADAMS Package Accession No. ML16088A324), as supplemented by letters dated through June 26, 2018, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the NRC’s regulations. As required by the Act and the NRC’s regulations in chapter 1 of title 10 of the Code of Federal Regulations (10 CFR), the NRC has made appropriate findings, which it has set forth in the renewed license. The NRC published a public notice of the proposed issuance of the renewed license, which included an opportunity for a hearing, in the Federal Register on May 31, 2016 (81 FR 34379). No adjudicatory matters are pending before the Commission or the Atomic Safety and Licensing Board Panel regarding the WF3 license renewal application.

For further details with respect to this action, see: (1) Entergy’s license renewal application for WF3 dated March 23, 2016 (ADAMS Package Accession No. ML16088A324), as supplemented by letters through June 26, 2018, (2) the NRC’s safety evaluation report published on August 17, 2018 (ADAMS Accession No. ML18228A668), (3) the NRC’s final supplemental environmental impact statement (NUREG–1437, Supplement 59) for WF3 published on November 20, 2018 (ADAMS Accession No. ML18323A103), and (4) the NRC’s record of decision (ADAMS Accession No. ML18275A234).

II. Conclusion

As discussed in Chapter 5 of the final supplemental environmental impact statement for the WF3 license renewal (Supplement 59 to NUREG–1437), the NRC has determined that the adverse environmental impacts of license renewal for WF3 are not so great that preserving the option of license renewal for energy-planning decisionmakers would be unreasonable. This recommendation is based on: (1) The analysis and findings in the Generic Environmental Impact Statement for License Renewal of Nuclear Plants, (2) information provided in the environment report submitted by Entergy, (3) consultation with Federal, State, local, and Tribal agencies, and (4) the NRC’s independent environmental review.

Dated at Rockville, Maryland, this 28th day of January 2019.

Joseph E. Donoghue,
Deputy Director, Division of Materials and License Renewal, Office of Nuclear Reactor Regulation.
