SUPPLEMENTARY INFORMATION:

I. Abstract

The USPTO developed the Patents External Quality Survey in 2006 as part of its quality improvement efforts. This survey gauges customer satisfaction with respect to examination quality. It uses a longitudinal, rotating panel design to assess changes in customer perceptions, identify areas for improvement, and pinpoint key areas for additional examiner training. Participants of this survey include patent agents, attorneys, and other individuals from large domestic corporations (including those with 500+ employees), small and medium-size businesses, and universities and other non-profit research organizations. The USPTO also plans to survey independent inventors. The USPTO does not survey foreign entities.

From the Patent Application and Location Management (PALM) database, the USPTO draws a random sample of firms and entities that have filed more than 6 patent applications in a 12-month period. These firms and entities typically represent 95% of total domestic patent applications filed over the same period. The Patents External Quality Survey uses a rotating panel design to measure changes in the quality of USPTO’s work over time. Customers participate in two consecutive data collection periods (waves) before rotating out of the panel. Each wave is conducted over a two month period. One wave occurs during the months of January and February and the other wave occurs during July and August. The rotating panel design means that for each wave, 50 percent of the panel have participated in a prior wave and 50 percent are being surveyed for the first time. At the next panel rotation, the 50 percent of customers who have participated in two consecutive waves will be dropped, and the panel will be refreshed.

Respondents receive the Patents External Quality Survey by mail and can respond either by mail or electronically on the USPTO website. A survey packet containing the questionnaire, a separate cover letter prepared by the Deputy Commissioner for Patent Quality, a postage-paid, pre-addressed return envelope, and instructions for completing the survey electronically are mailed to all respondents. A pre-notification letter, reminder/thank you postcards, and telephone calls are used to encourage a response.

This is a voluntary survey and all responses remain confidential. The collected data is not linked to the respondent, and contact information that is used for sampling purposes is maintained in a separate file from the quantitative data. Respondents are not required to provide any identifying information such as their name, address, or Social Security Number. Instead, in order to access and complete the online survey, respondents must use the username, password, and survey ID number provided by the USPTO.
