Abstract: The Responsible Appliance Disposal Program (RAD) is a voluntary partnership program sponsored by the Environmental Protection Agency (EPA) that reduces emissions of ozone depleting substances (ODS) that can be attributed to improper disposal of appliances. Appliances can contain ozone depleting refrigerants and foams as well as universal wastes such as mercury, used oil, and polychlorinated biphenyls (PCB). Federal law requires refrigerant recovery and proper management of universal waste but does not require the recovery of appliance foam. In addition to being ODS, foam blowing agents and refrigerants in appliances may also have high global warming potentials (GWP). The RAD program works with utilities, retailers, manufacturers, state agencies, affiliates, and others to dispose of appliances using best environmental practices.

Form Numbers: 5900–32

Respondents/affected entities: The following is a list of North American Industry Classification System (NAICS) codes for organizations potentially affected by the information requirements covered under this ICR are:

2211 Utilities
3352 Manufacturers
443141 Retailers
611310 Universities
999300 State/Municipality

Respondent’s obligation to respond: Voluntary.

Estimated number of respondents: 48 (over three years).

Frequency of response: Annual, and when desired.

Total estimated burden: 292 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: $36,753 (per year), includes $0 annualized capital or operation & maintenance costs.

Changes in estimates: There is a decrease of 33 hours in the total estimated respondent burden compared with the 325 hours for the ICR currently approved by OMB. This decrease is due in part to a decrease in the number of respondents due to recycling industry changes, as well as a reduction in the number of partners participating in the program each year.
