

Fund be permitted to adopt a Distribution Policy, pursuant to which the Fund would distribute periodically to its stockholders a fixed percentage of the market price of the Fund's common stock at a particular point in time or a fixed percentage of net asset value ("NAV") at a particular time or a fixed amount per share of common stock, any of which may be adjusted from time to time.

3. Applicants request an order under section 6(c) of the Act granting an exemption from section 19(b) of the Act and rule 19b-1 to permit a Fund to distribute periodic capital gain dividends (as defined in section 852(b)(3)(C) of the Code) as frequently as twelve times in any one taxable year in respect of its common stock (and as often as specified by, or determined in accordance with the terms of, any preferred stock issued by the Fund). Section 6(c) of the Act provides, in relevant part, that the Commission may exempt any person or transaction from any provision of the Act to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

4. Applicants state that any order granting the requested relief will be subject to the terms and conditions stated in the application, which generally are designed to address the concerns underlying section 19(b) and rule 19b-1, including concerns about proper disclosures and shareholders' understanding of the source(s) of a Fund's distributions and concerns about improper sales practices. Among other things, such terms and conditions require that (1) the board of directors or trustees of the Fund (the "Board") review such information as is reasonably necessary to make an informed determination of whether to adopt the proposed Distribution Policy and that the Board periodically review the amount of the distributions in light of the investment experience of the Fund, and (2) that the Fund's shareholders receive appropriate disclosures concerning the distributions.

For the Commission, by the Division of Investment Management, under delegated authority.

Eduardo A. Aleman,

Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-85047; File No. SR-ICC-2019-001]

Self-Regulatory Organizations; ICE Clear Credit LLC; Proposed Rule Change Relating to the ICE CDS Clearing: Back-Testing Framework

February 4, 2019.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934,¹ and Rule 19b-4,² notice is hereby given that on January 28, 2019, ICE Clear Credit LLC ("ICC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by ICC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

The principal purpose of the proposed rule change is to revise the ICE CDS Clearing: Back-Testing Framework ("Back-Testing Framework"). These revisions do not require any changes to the ICC Clearing Rules ("Rules").

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, ICC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. ICC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of these statements.

(A) Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(a) Purpose

ICC proposes to update and formalize the Back-Testing Framework that describes ICC's back-testing approach, back-testing procedures, and guidelines for remediating poor back-testing results. ICC proposes to formalize the Back-Testing Framework following Commission approval of the proposed rule change.

ICC's Back-Testing Framework includes a discussion of ICC's back-

testing approach to verify that the number of actual losses is consistent with the number of projected losses. Generally, ICC's back-testing analysis counts the number of occurrences, also referred to as exceedances, when the observed portfolio loss for a given horizon is greater than the model projected risk measure, defined as the sum of the selected initial margin components. The total number of exceedances is evaluated against the desired risk quantile and the model is considered well calibrated if the number of exceedances is consistent with the chosen risk quantile. The Back-Testing Framework also addresses multi-currency portfolios by accounting for the foreign exchange risk exposure and summarizes the associated back-testing analysis, which is performed in the clearinghouse base currency (*i.e.*, U.S. Dollar).

ICC utilizes the Basel Traffic Light System ("BTLS") to assess the soundness of its risk management model ("model"). The Back-Testing Framework contains a summary of the BTLS, including descriptions and calculations associated with each zone of the BTLS. The BTLS is based on three zones: Green, yellow, and red. Each zone is defined by the maximum number of acceptable exceedances. In practice, the more portfolios that fall within the green zone, the sounder the model. The BTLS does not penalize the model for conservativeness.

The Back-Testing Framework contains ICC's procedures for performing back-testing analyses. The ICC Risk Management Department ("ICC Risk") performs daily, weekly, monthly, and quarterly portfolio-level back-testing analyses. The Back-Testing Framework sets forth ICC's calculation of the observed loss, which is referred to as the N-day worst unrealized profit/loss ("P/L"), using the changes in portfolio net asset values ("NAVs"). The initial margin risk horizon is reflected as "N-day" where $N \geq 5$ is the initial margin risk horizon or the Margin Period of Risk ("MPOR"). The back-testing analysis is based on the greatest MPOR, rounded up to the nearest integer, for instruments in the considered portfolio. For example, if an instrument is subject to 5.5-day MPOR estimations, then the back-testing analysis is performed by comparing the model projected risk measure to the N-day worst unrealized P/L with $N=6$. The model projected risk measure, which is subject to back-testing, is the sum of the following selected initial margin components: Integrated spread response, basis risk, and interest rate sensitivity ("back-tested components"). Under the Back-

¹ 15 U.S.C. 78s(b)(1)

² 17 CFR 240.19b-4.

Testing Framework, the remaining components of initial margin are excluded because they are not always market observed and statistically modeled.

ICC back-tests its model with Clearing Participant (“CP”) portfolios and a hypothetical set of portfolios (“special strategy portfolios”) at the 99.5% risk quantile. Under the Back-Testing Framework, back-testing analysis is performed for the model at the 99.5% risk quantile for all CP-related portfolios. The Back-Testing Framework also includes a sample set of special strategy portfolios, which allow ICC to consider a range of hypothetical but realistic portfolios in its back-testing analysis. Back-testing results for the special strategy portfolios are reviewed periodically to identify and assess potential weaknesses in model assumptions.

The Back-Testing Framework describes ICC’s procedures for reporting back-testing results. Daily portfolio back-testing results are reported on a periodic basis for each CP based on the appropriate MPOR. The Back-Testing Framework provides example computations for a sample MPOR of 5 days (*i.e.*, all instruments in the considered portfolio are subject to a 5-day MPOR). For each day in the back-testing period, all components of initial margin are provided, and the back-tested components and non-back-tested components are identified. The sum of the back-tested components is given alongside the unrealized P/L and the associated shortfall. An exceedance summary shows the total number of exceedances in the period and states the maximum number of exceedances that satisfy each zone in the BTLS. Back-testing results for the full period are also reported, and the back-tested components and the N-day P/L results for every back-tested day are computed for each portfolio associated with a given CP.

The Back-Testing Framework discusses the exceedance summaries that are provided when ICC back-tests its model with CP and special strategy portfolios at the 99.5% risk quantile. The Back-Testing Framework notes the reporting frequency, along with the information that is delivered as part of an exceedance summary, such as the number of observations and exceedances for the set of back-testing results and the maximum number of exceedances allowed in each zone in the BTLS. Moreover, in addition to assessing the model’s performance by back-testing, the Back-Testing Framework directs ICC Risk to conduct

monthly parameter reviews and parameter sensitivity analyses.

ICC Risk also periodically reports univariate back-testing results, namely, instrument and Risk Factor³ (“RF”) back-testing results, depending on market conditions. The Back-Testing Framework discusses how back-testing results are computed and reported for SN RFs and index instruments. As noted above, the back-testing analysis is performed for the model at the 99.5% risk quantile and exceedance summary results are generated. The Back-Testing Framework defines the model projected risk measure with respect to univariate back-testing as the sum of the integrated spread response and the interest rate sensitivity (“univariate back-tested components”) and directs ICC Risk to perform several analyses if an exceedance is observed, which include, among others, an analysis of the spread and recovery rate changes. The Back-Testing Framework also contains information regarding ICC Risk’s performance of univariate back-testing analysis in spread log-return space, including the utilization of different mean absolute deviation estimates and an indication of when such analysis may be performed.

The Back-Testing Framework provides guidelines for remediating poor back-testing results. Back-testing results are identified as poor if the number of observed exceedances at the portfolio level falls in the red zone of the BTLS. The Back-Testing Framework discusses various actions to be taken upon the identification of poor back-testing results, which include seeking feedback from the Risk Working Group (“RWG”) ⁴ and consulting with the Risk Committee on any necessary remedial action. The Back-Testing Framework describes an instance where the number of exceedances falls in the red zone but may not be indicative of poor back-testing results, namely, where overlapping back-testing periods are involved and the effects of one adverse observation are responsible for a cluster of exceedances. The Back-Testing Framework provides the Chief Risk Officer and Risk Oversight Officer with the responsibility and the authority to determine whether the number of exceedances is indicative of poor back-testing results. The Back-Testing Framework also notes the actions to be taken if the number of exceedances falls in the yellow zone, including a review

³ ICC deems each index, sub-index, or underlying single name (“SN”) reference entity a separate RF.

⁴ The RWG consists of risk personnel from CPs and provides input to help ensure ICC’s risk management framework is robust.

by ICC Risk to determine the cause of the model’s worsened performance and, if necessary, a complimentary back-testing analysis without overlapping back-testing periods.

Under the Back-Testing Framework, if poor back-testing results are identified at the portfolio level, individual RF back-testing results are further analyzed. The Back-Testing Framework contains information regarding the analysis if poor back-testing results are identified for certain RFs, including analysis on the spread log-return statistical model assumptions, estimation techniques, and estimated parameters.

To remediate poor back-testing results, the Back-Testing Framework provides ICC Risk with the authority to take various actions depending on the situation, including updating statistical parameters (*i.e.*, parameters estimated by statistical analysis of data sets) and increasing the frequency of parameter updates. The Back-Testing Framework references several situations that may lead to poor back-testing results, along with the actions that ICC Risk may take for remediation, including poor back-testing results associated with distressed SN RFs, poor performance at the portfolio level driven by improper portfolio benefits, and poor back-testing results due to recent changes in the dependence structure among RFs. Under the Back-Testing Framework, ICC Risk may apply additional initial margin while investigating the model’s poor performance and, if needed, recommend model enhancements to the Risk Committee and the Board.

(b) Statutory Basis

Section 17A(b)(3)(F) of the Act ⁵ requires, among other things, that the rules of a clearing agency be designed to promote the prompt and accurate clearance and settlement of securities transactions, and to the extent applicable, derivative agreements, contracts and transactions; to assure the safeguarding of securities and funds which are in the custody or control of the clearing agency or for which it is responsible; in general, to protect investors and the public interest; and to comply with the provisions of the Act and the rules and regulations thereunder. ICC believes that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to ICC, in particular, to Section 17(A)(b)(3)(F), ⁶ because ICC believes that the proposed rule change to formalize the Back-Testing

⁵ 15 U.S.C. 78q-1(b)(3)(F).

⁶ *Id.*

Framework promotes the soundness of ICC's risk management model. The Back-Testing Framework describes ICC's back-testing approach, back-testing procedures, and guidelines for remediating poor back-testing results. The various elements set forth in the Back-Testing Framework assess the ability of the model to reliably forecast risk at the selected risk quantile and ensure that ICC takes appropriate remedial action upon the identification of poor back-testing results. The Back-Testing Framework provides assurances as to the appropriateness of the model, including the appropriateness of margin requirements, thereby facilitating ICC's ability to promptly and accurately clear and settle its cleared CDS contracts; enhancing ICC's ability to assure the safeguarding of securities and funds which are in the custody or control of ICC or for which it is responsible; and protecting investors and the public interest. Moreover, ICC believes that having policies and procedures that clearly and accurately document ICC's back-testing procedures are an important component to the effectiveness of ICC's risk management system, which promotes the prompt and accurate clearance and settlement of securities transactions, derivatives agreements, contracts, and transactions; the safeguarding of securities and funds which are in the custody or control of ICC or for which it is responsible; and the protection of investors and the public interest. As such, the proposed rule change is designed to promote the prompt and accurate clearance and settlement of securities transactions, derivatives agreements, contracts, and transactions; to contribute to the safeguarding of securities and funds associated with security-based swap transactions in ICC's custody or control, or for which ICC is responsible; and, in general, to protect investors and the public interest within the meaning of Section 17A(b)(3)(F) of the Act.⁷

In addition, the proposed rule change is consistent with the relevant requirements of Rule 17Ad-22.⁸ Rule 17Ad-22(b)(2)⁹ requires ICC to establish, implement, maintain and enforce written policies and procedures reasonably designed to use margin requirements to limit its credit exposures to participants under normal market conditions and use risk-based models and parameters to set margin requirements and review such margin requirements and the related risk-based models and parameters at least monthly.

The Back-Testing Framework requires the remediation of poor-back-testing results; the performance of daily, weekly, monthly, and quarterly portfolio-level back-testing analyses; and the performance of monthly parameter reviews and parameter sensitivity analyses. Such procedures serve to promote the soundness of ICC's risk management model and to ensure that ICC's risk management system is effective and appropriate in addressing the risks associated with clearing security based swap-related portfolios. Namely, by requiring that ICC review and improve the model, the Back-Testing Framework promotes ICC's use of margin requirements to limit its credit exposures to participants under normal market conditions and ICC's use of risk-based models and parameters to set margin requirements and review such margin requirements and the related risk-based models and parameters at least monthly, consistent with Rule 17Ad-22(b)(2).¹⁰

Rule 17Ad-22(b)(3)¹¹ requires ICC to establish, implement, maintain and enforce written policies and procedures reasonably designed to maintain sufficient financial resources to withstand, at a minimum, a default by the two CP families to which it has the largest exposures in extreme but plausible market conditions. The Back-Testing Framework supports ICC's ability to maintain sufficient margin requirements and enhances ICC's approach to identifying potential weaknesses in the risk methodology by measuring the quality of its model using the B-TLS, thereby ensuring that ICC continues to maintain sufficient financial resources to withstand, at a minimum, a default by the two CP families to which it has the largest exposures in extreme but plausible market conditions, consistent with the requirements of Rule 17Ad-22(b)(3).¹²

Rule 17Ad-22(d)(8)¹³ requires ICC to establish, implement, maintain and enforce written policies and procedures reasonably designed to have governance arrangements that are clear and transparent to fulfill the public interest requirements in Section 17A of the Act.¹⁴ The Back-Testing Framework clearly assigns and documents responsibility and accountability for performing back-testing analyses and remediating poor back-testing results. These governance arrangements are clear and transparent, such that

information relating to the assignment of responsibilities and the requisite involvement of the Chief Risk Officer, the Risk Oversight Officer, ICC Risk, the RWG, the Risk Committee, and the Board is clearly documented, consistent with the requirements of Rule 17Ad-22(d)(8).¹⁵

(B) Clearing Agency's Statement on Burden on Competition

ICC does not believe the proposed rule change would have any impact, or impose any burden, on competition. The proposed change to formalize the Back-Testing Framework will apply uniformly across all market participants. Therefore, ICC does not believe the proposed rule change imposes any burden on competition that is inappropriate in furtherance of the purposes of the Act.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments relating to the proposed rule change have not been solicited or received. ICC will notify the Commission of any written comments received by ICC.

III. Date of Effectiveness of the Proposed Rule Change

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

- (A) By order approve or disapprove such proposed rule change, or
- (B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-ICC-2019-001 on the subject line.

Paper Comments

Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

All submissions should refer to File Number SR-ICC-2019-001. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filings will also be available for inspection and copying at the principal office of ICE Clear Credit and on ICE Clear Credit's website at <https://www.theice.com/clear-credit/regulation>.

All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-ICC-2019-001 and should be submitted on or before March 1, 2019.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁶

Eduardo A. Aleman,
Deputy Secretary.

BILLING CODE 8011-01-P

SOCIAL SECURITY ADMINISTRATION

[Docket No. SSA 2017-0063]

Privacy Act of 1974; Matching Program

AGENCY: Social Security Administration (SSA).

ACTION: Notice of a new matching program.

SUMMARY: In accordance with the provisions of the Privacy Act, as amended, this notice announces a new matching program with the Office of Personnel Management (OPM).

This matching agreement sets forth the terms, conditions, and safeguards under which OPM will provide SSA with civil service benefit and payment data. This disclosure will provide SSA with information necessary to verify an individual's self-certification of eligibility for the Extra Help with Medicare Prescription Drug Plan Costs program (Extra Help). It will also enable SSA to identify individuals who may qualify for Extra Help as part of its Medicare outreach efforts.

DATES: The deadline to submit comments on the proposed matching program is 30 days from the date of publication of this notice in the **Federal Register**. The matching program will be applicable on October 1, 2018, or once a minimum of 30 days after publication of this notice has elapsed, whichever is later. The matching program will be in effect for a period of 18 months.

ADDRESSES: Interested parties may comment on this notice by either telefaxing to (410) 966-0869, writing to Mary Ann Zimmerman, Acting Executive Director, Office of Privacy and Disclosure, Office of the General Counsel, Social Security Administration, G-401 WHR, 6401 Security Boulevard, Baltimore, MD 21235-6401, or emailing MaryAnn.Zimmerman@ssa.gov. All comments received will be available for public inspection by contacting Ms. Zimmerman at this street address.

FOR FURTHER INFORMATION CONTACT: Interested parties may submit general questions about the matching program to Mary Ann Zimmerman, Acting Executive Director, Office of Privacy and Disclosure, Office of the General Counsel, by any of the means shown above.

Mary Zimmerman,

Acting Executive Director, Office of Privacy and Disclosure, Office of the General Counsel.

Participating Agencies: SSA and OPM.

Authority for Conducting the Matching Program: The legal authority for SSA to conduct this matching is sections 1144(a)(1) and (b)(1) and 1860D-14(a)(3) of the Social Security Act (Act) (42 U.S.C. 1320b-14(a)(1) and (b)(1) and 1395w-114(a)(3)). Pursuant to these sections, SSA must determine whether a Social Security Part D eligible

individual is a subsidy-eligible individual.

Purpose(s): The purpose of this matching program is to set forth the terms, conditions, and safeguards under which OPM will disclose to SSA civil service benefit and payment data for verifying an individual's self-certification of eligibility for the Prescription Drug Plan Costs program (Extra Help). It will also enable SSA to identify individuals who may qualify for Extra Help as part of its Medicare outreach efforts.

Categories of Individuals: The individuals whose information is involved in this matching program are individuals who self-certify their eligibility for the Extra Help program.

Categories of Records: OPM's data file will consist of approximately 75,000 records of updated payment information for new civil service annuitants and annuitants whose civil service annuity has changed. SSA's comparison file consists of approximately 91 million records from the Medicare Database file. The number of people who apply for Extra Help determines in part the number of records matched.

OPM will provide SSA with electronic files containing civil service benefit and payment data for individuals who apply for the Extra Help program. The file includes:

- Payee Name and Date of Birth,
- Payee Social Security number,
- Payee Civil Service Claim Number, and
- Amount of current gross civil service benefits.

System(s) of Records: OPM will provide SSA with electronic files containing civil service benefit and payment data from the OPM system of records published as OPM/Central-1 (Civil Service and Insurance Records), on October 8, 1999 (64 FR 54930), as amended on March 20, 2008 (73 FR 15013).

SSA will match OPM data with its system of records 60-0321, Medicare Database file, last fully published at 71 FR 42159 (July 25, 2006), and amended at 72 FR 69723 (December 10, 2007).
