

sampling design was revised to include only 5 of 12 management regions as an index to the statewide harvest, these 5 regions representing about 90% of the statewide subsistence bird harvest. This modification was needed to make survey effort compatible with the funding available for the survey. The number of communities and households to be surveyed each year were also adjusted based on statistical methods to

maximize accuracy of harvest estimates given the survey funding. We also reduced the number of household visits from seasonal (3 times per year) to annual (once a year). These modifications much reduced the estimated survey burden.

History and Description of the Remains

In 1996 and 1998, human remains representing, at minimum, one individual were removed from CA-FRE-2481 in Fresno County, CA. This site was excavated by Don Wren and his field archeology class for the Wiser Project, and is located on private property. In January 2017, funded by a 2016 NAGPRA Consultation/Documentation grant awarded to the State Center Community College District, an osteological examination of the faunal collections was conducted to determine if human remains were present. That examination resulted in the identification of the human remains described in this inventory. The human remains belong to one adult of indeterminate sex, and are represented by one tooth and three tooth fragments. No known individuals were identified. The three associated funerary objects are one steatite rim sherd, one blue hexagonal trade bead, and one ochre fragment.

Determinations Made by the State Center Community College District—Fresno City College

Officials of the State Center Community College District—Fresno City College have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of one individual of Native American ancestry, based on archeological context.
- Pursuant to 25 U.S.C. 3001(3)(A), the three objects described in this notice are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and associated funerary objects

and the Big Sandy Rancheria of Western Mono Indians of California (previously listed as the Big Sandy Rancheria of Mono Indians of California), based on geography and oral tradition.

Additional Requestors and Disposition

Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains and associated funerary objects should submit a written request with information in support of the request to Mary Beth Miller, Interim Dean of Social Sciences, in care of Jill Minar, Ph.D., Fresno City College of The State Center Community College District, 1101 E University Avenue, Fresno, CA 93741, telephone (559) 442-8210, email jill.minar@fresnocitycollege.edu, by March 11, 2019. After that date, if no additional requestors have come forward, transfer of control of the human remains and associated funerary objects to the Big Sandy Rancheria of Western Mono Indians of California (previously listed as the Big Sandy Rancheria of Mono Indians of California) may proceed.
