

Approved Project that have not changed.

The changed circumstances associated with the Approved Project include new information regarding the condition of existing structures adjacent to the LPOE that affect the ability of GSA to implement the Approved Project. The Approved Project anticipated that construction of the pedestrian plaza would require demolition of the existing Milo Building within the LPOE. During final design, it was discovered that two existing buildings adjacent to the Milo Building on the Additional Land Area would likely collapse when the Milo Building is removed. The condition of these adjacent buildings was not known at the time the 2009 Final EIS or 2014 Final SEIS were prepared and this changed circumstance has bearing on the ability to implement the Approved Project.

Due to the changed circumstances and changes to the Approved Project, GSA made the decision to prepare an SEIS for the Revised Project.

The purpose of the Revised Project is the same as the Approved Project that was identified in the 2009 Final EIS and 2014 Final SEIS. The purpose of the Revised Project is to improve operational efficiency, security, and safety for cross-border travelers and federal agencies at the San Ysidro LPOE.

The Draft SEIS analyzed two alternatives of the Revised Project, as well as the No Action Alternative. Both of the Action Alternatives include the proposed modifications described above, as well as the other improvements originally proposed as part of the Approved Project. Alternative 1 would include demolition of the two existing buildings within the Additional Land Area that would be added to the LPOE and incorporated into the pedestrian plaza. Alternative 2 would involve renovation/adaptive reuse of the existing buildings on the Additional Land Area that would be added to the LPOE and incorporated into the design of the pedestrian plaza and LPOE. Under the No Action Alternative, GSA would continue to implement the Approved Project except that the Milo Building would not be demolished.

The Draft SEIS was made publicly available on September 24, 2018 for a 45-day period. The Notice of Availability for the Draft SEIS was published in the **Federal Register** on September 24, 2018. A public meeting took place on October 17, 2018 in the San Ysidro community. In preparing this Final SEIS, GSA considered public comments received regarding the Draft SEIS during the public review period.

After careful consideration of the environmental analysis and associated environmental effects of the action alternatives and No Action Alternative, the needs of the federal agencies operating at the San Ysidro LPOE, and comments received on the Draft SEIS, GSA identified Alternative 1 as the Preferred Alternative.

This Alternative would best satisfy the Purpose and Need of the Revised Project and would result in greater benefits to cross-border circulation and mobility within the project area compared to Alternative 2.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity; Comment Request Proposed Projects: Domestic Victims of Human Trafficking Program

Title: Domestic Victims of Human Trafficking Program Data.

OMB No.: 0970-NEW.

Description: The Trafficking Victims Protection Act of 2000 (TVPA), as amended, authorizes the Secretary of Health and Human Services to establish a program to assist United States citizens and lawful permanent residents who are victims of severe forms of trafficking (22 U.S.C. 7105(f)). The Office on Trafficking in Persons (OTIP) awarded thirteen cooperative agreements to implement the Domestic Victims of Human Trafficking (DVHT) Program. The DVHT Program provides funding for comprehensive case management services to domestic victims of severe forms of trafficking to ensure the provision of services with an emphasis on long-term housing, substance abuse treatment, and the integration of survivor-led services.

The intent of this program is to build, expand, and sustain organizational and community capacity to deliver trauma-informed, strengths-based, and person-centered services for domestic victims of human trafficking through coordinated case management, a system of agency services, and community partnerships. The DVHT Program encourages innovative practices and collaboration efforts among community stakeholders to ensure long-term outcomes for domestic victims of severe forms of trafficking.

OTIP proposes to collect information from DVHT grantees on a semi-annual and annual basis to help measure each grant project's performance and the success of the program in assisting participants, to assist grantees to assess and improve their projects over the course of the project period, and to fulfill congressional reporting requests. The proposed information collection includes elements on participant demographics (e.g., age, sex, and country of origin), types of trafficking experienced (sex, labor, or both), types of enrollment, types of services requested and provided, barriers to service delivery, types of partnerships developed through the grant, and the types of training and technical assistance provided to subrecipient organizations or other partners.

This information will help OTIP assess the project's performance in assisting victims of trafficking and will better enable DVHT grantees to meet the program objectives and to monitor and evaluate the quality of case management services provided to victims. OTIP will also include aggregate information in reports to Congress to help inform strategies and policies to assist domestic victims of human trafficking.

Respondents: Domestic Victims of Human Trafficking Program Grantees.
