

agency to prepare a regulatory flexibility analysis of any rule subject to notice-and-comment rulemaking requirements under the Administrative Procedure Act or any other statute unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities (*i.e.*, small businesses and small governments). The danger zone is necessary to protect public safety during use of the small arms range. Unless information is obtained to the contrary during the comment period, the Corps certifies that the proposed rule would have no significant economic impact on the public. After considering the economic impacts of this proposed danger zone regulation on small entities, I certify that this action will not have a significant impact on a substantial number of small entities.

c. Review Under the National Environmental Policy Act

Due to the administrative nature of this action and because there is no intended change in the use of the area, the Corps expects that this regulation, if adopted, will not have a significant impact to the quality of the human environment and, therefore, preparation of an environmental impact statement will not be required. An environmental assessment will be prepared after the comment period is closed and all comments have been received and considered.

d. Unfunded Mandates Act

This proposed rule does not impose an enforceable duty among the private sector and, therefore, it is not a Federal private sector mandate and it is not subject to the requirements of either Section 202 or Section 205 of the Unfunded Mandates Act. We have also found under Section 203 of the Act, that small governments will not be significantly and uniquely affected by this rulemaking.

List of Subjects in 33 CFR Part 334

Danger zones, Marine safety, Navigation (water), Restricted areas, Waterways.

For the reasons set out in the preamble, the Corps proposes to amend 33 CFR part 334 as follows:

PART 334—DANGER ZONE AND RESTRICTED AREA REGULATIONS

■ 1. The authority citation for 33 CFR part 334 continues to read as follows:

Authority: 40 Stat. 266 (33 U.S.C. 1) and 40 Stat. 892 (33 U.S.C. 3).

■ 2. Revise § 334.390 to read as follows:

§ 334.390 Atlantic Ocean south of entrance to Chesapeake Bay; firing range.

(a) *The danger zone.* (1) A section extending seaward for a distance of 12,000 yards between two radial lines bearing 030° True and 083° True, respectively, from a point on shore at latitude 36°46'48" N, longitude 75°57'24" W; and an adjacent sector extending seaward for a distance of 15 nautical miles between two radial lines bearing 083° True and 150° True, respectively, from the same shore position. The datum for these coordinates is WGS-1984.

(b) *The regulations.* (1) To accommodate ingress and egress within the southern approach to the Chesapeake Bay Federal navigation channels, no live fire exercise will take place within the area northeast of, and defined by a line intersecting points latitude 36°47'59" N, longitude 75°46'05" W and latitude 36°44'25" N, longitude 75°38' 57" W, and this area is open to unrestricted surface navigation.

(2) Within the remainder of the danger zone vessels shall proceed through the area with caution and shall remain therein no longer than necessary for the purpose of transit.

(3) When firing is in progress during daylight hours, red flags will be displayed at conspicuous locations on the beach. When firing is in progress during periods of darkness, red flashing lights will be displayed from conspicuous locations on the beach which are visible from the water a minimum distance of four (4) nautical miles.

(4) Firing on the ranges will be suspended as long as any vessel is within the danger zone.

(5) Lookout posts will be manned by the activity or agency operating the firing range at the Naval Air Station Oceana, Dam Neck Annex, in Virginia Beach, Virginia. After darkness, night vision systems will be utilized by lookouts to aid in locating vessels transiting the area.

(6) There shall be no firing on the range during periods of low visibility which would prevent the recognition of a vessel (to a distance of 7,500 yards) which is properly displaying navigation lights, or which would preclude a vessel from observing the red range flags or lights.

(7) Throughout the entire danger zone anchoring, dredging, trawling and any bottom disturbing activities should be conducted with caution due to the potential of unexploded ordnance (UXO) and other munitions and explosives of concern (MEC) on the bottom.

(c) *Enforcement.* The regulation in this section shall be enforced by the Commander, Naval Air Force Atlantic, U.S. Fleet Forces Command, Norfolk, Virginia, and such agencies as he or she may designate.

Dated: February 7, 2019. Approved:

Thomas P. Smith,

Chief, Operations and Regulatory Division, Directorate of Civil Works.

BILLING CODE 3720-58-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA-R05-OAR-2018-0126; FRL-9989-32-Region 5]

Air Plan Approval; Indiana; Proposed Approval of a Revision to the Sulfur Dioxide State Implementation Plan for United States Steel-Gary Works

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a March 6, 2018 request by the Indiana Department of Environmental Management (IDEM) to revise its State Implementation Plan (SIP) for the United States Steel-Gary Works (US Steel-Gary Works). The proposed SIP revision pertains to the removal of all sulfur dioxide (SO₂) emission limitations for the facility's coke plant, which permanently ceased operation on March 30, 2015, and other administrative changes. The SIP revision provides for an overall reduction in SO₂ emissions at the facility.

DATES: Comments must be received on or before March 15, 2019.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-R05-OAR-2018-0126 at <http://www.regulations.gov>, or via email to blakley.pamela@epa.gov. For comments submitted at [Regulations.gov](http://www.regulations.gov), follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from [Regulations.gov](http://www.regulations.gov). For either manner of submission, EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment.

The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the “For Further Information Contact” section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

FOR FURTHER INFORMATION CONTACT: Emily Crispell, Environmental Scientist, Control Strategies Section, Air Programs Branch (AR-18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 353-8512, crispell.emily@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document whenever “we,” “us,” or “our” is used, we mean EPA. This supplementary information section is arranged as follows:

- I. Background
- II. Summary of Changes to Existing Rule
- III. Summary of 110(l) Analysis
- IV. What action is EPA taking?
- V. Incorporation by Reference
- VI. Statutory and Executive Order Reviews

I. Background

US Steel-Gary Works is an integrated steel mill located in Gary, Indiana. On March 30, 2015, the facility permanently ceased the operation of its entire coke plant. The coke plant consisted of the coal handling facilities, coke oven batteries, coke byproducts recovery plant, coke oven desulfurization facility, and #2 coke plant boiler house.

IDEM amended 326 Indiana Administrative Code (326 IAC) 7-4.1-20 to remove SO₂ emission limitations applicable to the coke plant. IDEM held a public hearing on October 11, 2017 and received one question regarding whether US Steel-Gary Works would be required to reapply for permits if they chose to reopen the coke plant facility. IDEM confirmed that US Steel-Gary Works would have to reapply for permits if they chose to reopen the coke plant.

IDEM adopted the revised rule on October 11, 2017, which became effective on February 21, 2018.

II. Summary of Changes to Existing Rule

The existing rule 326 IAC 7-4.1-20 contained the SO₂ emission limitations

for various emission units at US Steel-Gary Works, depending on the operation status of the coke oven gas desulfurization unit. The sole purpose of the coke oven gas desulfurization unit was to control coke oven gas emissions from the coke plant. IDEM revised 326 IAC 7-4.1-20 to remove all SO₂ sources and emission limits associated with the coke plant. IDEM renumbered and retained the remainder of the rule which contains SO₂ emission limitations for other operating units at the facility such as the turboblower boiler house units, number 4 boiler house units, blast furnace stove stacks, 84-inch hot strip mill units, number 3 sinter plant windbox gas cleaning systems, and baghouses.

III. Summary of 110(l) Analysis

According to Clean Air Act (CAA) Section 110(l), EPA cannot approve a revision of a SIP if the revision would interfere with any applicable requirement concerning attainment of the National Ambient Air Quality Standards and Reasonable Further Progress (as defined in Section 171 of the CAA). Indiana’s submission is consistent with CAA Section 110(l) because the changes to the facility will result in a decrease in SO₂ emissions in excess of 3792.2 tons per year.

IV. What action is EPA taking?

EPA is proposing to approve IDEM’s March 6, 2018 submittal as a revision to its existing SIP for US Steel-Gary Works. EPA is requesting comments on the proposed approval.

V. Incorporation by Reference

In this document, EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, EPA is proposing to incorporate by reference revisions to Indiana rule 326 IAC 7-4.1-20 U.S. Steel-Gary Works Sulfur Dioxide Emission Limitations, effective on February 21, 2018. EPA has made, and will continue to make, these documents generally available through www.regulations.gov and at the EPA Region 5 Office (please contact the person identified in the “For Further Information Contact” section of this preamble for more information).

VI. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions,

EPA’s role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
 - Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;
 - Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
 - Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
 - Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);
 - Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
 - Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
 - Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
 - Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
 - Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).
- In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Reporting and recordkeeping requirements, Sulfur oxides.

Dated: December 21, 2018.

James O. Payne

Acting Regional Administrator, Region 5.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY**40 CFR Part 52**

[EPA-R03-OAR-2018-0764; FRL-9989-45-Region 3]

Approval and Promulgation of Air Quality Implementation Plans; Pennsylvania; Allegheny County Reasonable Available Control Technology for the 2008 Ozone National Ambient Air Quality Standard

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a state implementation plan (SIP) revision submitted by the Pennsylvania Department of Environmental Protection (PADEP) on behalf of the Allegheny County Health Department (ACHD) for the purpose of satisfying the volatile organic compound (VOC) reasonably available control technology (RACT) requirements for source categories covered by control technique guidelines (CTGs) under the 2008 8-hour ozone national ambient air quality standard (NAAQS). This action is being taken under the Clean Air Act (CAA).

DATES: Written comments must be received on or before March 15, 2019.

ADDRESSES: Submit your comments, identified by Docket ID Number EPA-R03-OAR-2018-0764 at <http://www.regulations.gov>, or via email to spielberger.susan@epa.gov. For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. For either manner of submission, EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be confidential business information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment.

The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

Megan Goold, (215) 814-2027, or by email at goold.megan@epa.gov.

SUPPLEMENTARY INFORMATION: On July 24, 2018, PADEP submitted, on behalf of ACHD, a SIP revision addressing the VOC CTG RACT requirements set forth by the CAA for the 2008 8-hour ozone NAAQS for Allegheny County (the 2018 VOC CTG RACT Submission for Allegheny County).

I. Background*A. General*

Ozone is formed in the atmosphere by photochemical reactions between VOCs and oxides of nitrogen (NO_x) in the presence of sunlight. In order to reduce ozone concentrations, the CAA requires control of VOC and NO_x emission sources to achieve emission reductions in moderate or more serious ozone nonattainment areas. Among effective control measures, RACT controls significantly reduce VOC and NO_x emissions from major stationary sources.

RACT is defined as the lowest emission limitation that a particular source is capable of meeting by the application of control technology that is reasonably available considering technological and economic feasibility.¹ CAA section 172(c)(1) provides that SIPs for nonattainment areas must include reasonably available control measures (RACM) for attainment of the NAAQS, including emissions reductions from existing sources through adoption of RACT. A major source in a nonattainment area is defined as any stationary source that emits or has the potential to emit NO_x or VOC emissions above a certain applicability threshold that is based on

¹ See December 9, 1976 memorandum from Roger Strelow, Assistant Administrator for Air and Waste Management, to Regional Administrators, "Guidance for Determining Acceptability of SIP Regulations in Non-Attainment Areas." See also 44 FR 53761, 53762 (September 17, 1979).

the ozone nonattainment classification of the area: Marginal, Moderate, Serious, or Severe. See "major stationary source" in CAA sections 182(b), 184(b) and 302. CAA sections 182(b)(2) and 182(f)(1) of the CAA require states with moderate (or worse) ozone nonattainment areas to implement RACT controls on all stationary sources and source categories covered by a CTG document issued by EPA and on all major sources of VOC and NO_x emissions located in the area. EPA's CTGs establish presumptive RACT control requirements for various VOC source categories. The CTGs typically identify a particular control level that EPA recommends as being RACT. In some cases, EPA has issued Alternative Control Techniques guidelines (ACTs) primarily for NO_x source categories, which in contrast to the CTGs, only present a range for possible control options but do not identify any particular option as the presumptive norm for what is RACT. CAA section 183(c) requires EPA to revise and update CTGs and ACTs as the Administrator determines necessary. EPA issued eleven new CTGs from 2006 through 2008. A list of CTGs issued by EPA can be found at <https://www.epa.gov/ground-level-ozone-pollution/control-techniques-guidelines-and-alternative-control-techniques>. States are required to implement RACT for the source categories covered by CTGs through the SIP. Source categories that are not covered by the CTGs are termed non-CTG sources (non-CTG sources are not covered by this SIP revision).

CAA section 184(a) of the CAA established a single ozone transport region (OTR), comprising all or part of 12 eastern states and the District of Columbia.² The entire Commonwealth of Pennsylvania is part of the OTR and, therefore, must comply with the RACT requirements in CAA section 184(b)(1)(B) and (2). Specifically, section 184(b)(1)(B) requires the implementation of RACT in OTR states with respect to all sources of VOC covered by a CTG. Additionally, section 184(b)(2) states that any stationary source with the potential to emit 50 tons per year (tpy) of VOCs shall be considered a major source and requires the implementation of major stationary source requirements in the OTR states as if the area were a moderate nonattainment area. A major source in a nonattainment area is defined as any stationary source that emits or has the potential to emit NO_x or VOC emissions above a certain applicability threshold

² Only a portion of the Commonwealth of Virginia is included in the OTR.
