SUPPLEMENTARY INFORMATION: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501-3520), the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection.

Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

OMB Control Number: 3060-XXXX.
Title: Creation of Interstitial 12.5 Kiloherz Channels in the 800 MHz Band Between 809-817/854-862 MHz.
Form Number: N/A.
Type of Review: New information collection.

Respondents: Business or other for-profit; Not-for-profit institutions; State, Local or Tribal Government.

Number of Respondents and Responses: 700 respondents, 350 responses.

Estimated Time per Response: 2 hours.

Frequency of Response: One-time reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this collection is contained in 47 U.S.C. 151, 154, 301, 303, and 332 of the Communications Act of 1934.

Total Annual Burden: 700 hours.

Total Annual Cost: No Cost.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for applicants filing applications to license channels in the 809-817/854-862 MHz band segment (800 MHz Mid-Band) to include confidential information with their application. Nonetheless, there is a need for confidentiality with respect to all applications filed with the Commission through its Universal Licensing System (ULS). Although ULS stores all information pertaining to the individual license via an FCC Registration Number (FRN), confidential information is accessible only by persons or entities that hold the password for each account, and the Commission's licensing staff. Information on private land mobile radio licensees is maintained in the Commission's system of records, FCC/WTB-1, "Wireless Services Licensing Records." The licensee records will be publicly available and routinely used in accordance with subsection (b) of the Privacy Act. TIN Numbers and material which is afforded confidential treatment pursuant to a request made under 47 CFR 0.459 will not be available for Public inspection. Any personally identifiable information (PII) that individual applicants provide is covered by a system of records, FCC/WTB-1, "Wireless Services Licensing Records," and these and all other records may be disclosed pursuant to the Routine Uses as stated in this system of records notice.

Needs and Uses: This collection will be submitted as a new collection after this 60-day comment period to the Office of Management and Budget (OMB) in order to obtain the full three-year clearance. Section 90.621(d)(4) adopted in the Commission's Report and Order FCC 18-143 requires an applicant to include a letter of concurrence from an incumbent licensee if the applicant files an application which causes contour overlap under a forward analysis or receives contour overlap under a reciprocal analysis when the applicant seeks to license channels in the 800 MHz Mid-Band. In the case of the forward analysis, the incumbent licensee must agree in its concurrence letter to accept any interference that occurs as a result of the contour overlap. In the case of the reciprocal analysis, the incumbent licensee must state in its concurrence letter that it does not object to the applicant receiving contour overlap from the incumbent's facility. The purpose of requiring applicants to obtain letters of concurrence if their application causes contour overlap under a forward analysis or receives contour overlap under a reciprocal analysis is to ensure incumbents in the 800 MHz Mid-Band are aware of the contour overlap before an application is granted.
