Calculation of Inflation Adjustments

The FCPIAA, as amended, directs federal agencies to adjust each civil
monetary jurisdiction for inflation in January of each year pursuant to a cost-of-living adjustment. The cost-of-living adjustment is based on the percent change between the U.S. Department of Labor’s Consumer Price Index for all-urban consumers (“CPI–U”) for the month of October preceding the date of the adjustment, and the CPI–U for October of the prior year. Based on that formula, the cost-of-living adjustment multiplier for 2019 is 1.02522. The FCPIAA also directs that these penalty level adjustments be rounded to the nearest dollar. Agencies do not have discretion over whether to adjust a maximum civil penalty, or the method used to determine the adjustment.

The following chart illustrates the application of these adjustments to the civil monetary penalties under the Commission’s jurisdiction.

#### Effective Dates of New Penalties

These new penalty levels apply to civil penalties assessed after the effective date of the applicable adjustment, including civil penalties whose associated violation predated the effective date. These adjustments do not retrospectively change previously assessed or enforced civil penalties that the FTC is actively collecting or has collected.

#### Procedural Requirements

The FCPIAA, as amended, directs agencies to adjust civil monetary penalties through rulemaking and to publish the required inflation adjustments in the Federal Register, notwithstanding section 553 of title 5, United States Code. Pursuant to this congressional mandate, prior public notice and comment under the APA and a delayed effective date are not required. For this reason, the requirements of the Regulatory Flexibility Act (“RFA”) also do not apply. Further, this rule does not contain any collection of information requirements as defined by the Paperwork Reduction Act of 1995 as amended. 44 U.S.C. 3501 et seq.

Computation of Time During Emergencies

AGENCY: Federal Energy Regulatory Commission, Department of Energy.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission (Commission or Agency) is amending its Rules of Practice and Procedure to update its provisions regarding the computation of time. This final rule will modify the Commission’s regulations to cover situations in which the Commission is closed due to adverse conditions—including inclement weather—even though some official duties may continue through telework-ready employees. This change will prevent unintended Commission action by operation of law and will provide clarity as to filing deadlines and deadlines for action by the Commission.

DATES: The rule will become effective February 14, 2019.

SUPPLEMENTARY INFORMATION:

I. Introduction

1. By this final rule, the Federal Energy Regulatory Commission (Commission or agency) is amending 18 CFR 385.2007 (Rule 2007) to cover the computation of time in situations in which the Commission is closed due to adverse conditions—including inclement weather—even though some official duties may be performed by telework-ready employees. This rule prevents unintended Commission action by operation of law and provides clarity as to filing deadlines and deadlines for action by the Commission. The rule imposes no new obligations on the public and is consistent with prior procedure for computing time.

II. Background

2. The Commission’s regulations address computing periods of time prescribed or allowed by statute or Commission rule or order. For many years, under Rule 2007, the last day of a time period is not counted if that day is a Saturday, Sunday, “part-day holiday that affects the Commission, or legal public holiday.” 1 In December 2003, the Commission issued Emergency Closures, 2 which added a provision to Rule 2007 to address the computation of time during closure of the Commission due to weather or other adverse conditions.

3. On April 10, 2018, the Office of Personnel Management (OPM) issued its final regulation implementing the weather and safety leave provisions of the Administrative Leave Act of 2016. 3 Under OPM’s regulations, Agencies may only grant weather and safety leave when it is determined that, because of severe weather or another emergency situation, employees cannot safely travel to or from, or perform work at, their normal worksite, a telework site, or other approved location. 4 OPM’s regulations further require that employees that are telework-ready continue to perform official duties, even though Federal offices are closed due to severe weather or another emergency situation. 5

III. Discussion

4. The timeframes for certain Commission action, including actions on certain rate proposals filed by natural gas pipeline companies, oil pipeline companies, and public utilities, are set by statute. 6 Although the Commission does not have the authority to change such statutory deadlines, the Commission has the authority to determine how such deadlines are computed. 7 For example, under Rule 2007, the last day of a time period is not counted if that day is a Saturday, Sunday, part-day holiday that affects the Commission, legal public holiday, or a day on which the Commission closes due to adverse conditions and does not reopen prior to its official close of business. 8

The Commission is amending Rule 2007 to implement the weather and safety leave provisions of the Administrative Leave Act of 2016 whereby the Commission is closed due to adverse conditions, including inclement weather or another emergency situation, even though telework ready employees may continue performing some official duties.

5. In such circumstances, employee and public access to the Commission’s physical facilities may be restricted, not all employees may be telework-ready, and not all telework-ready employees may be able to telework due to the adverse conditions. 9 The Commission’s ability to accept filings and issue orders thus may be affected when the Commission’s facilities are closed due to adverse conditions. Likewise, when the Commission’s facilities are closed due to adverse conditions, the public’s ability to submit a filing on the last day on which a filing is due may also be restricted. As such, the same justification on which the Commission relied to implement Rule 2007, and later to amend Rule 2007 to address emergency circumstances, is equally applicable to instances in which the Commission is closed, but employees continue some official duties through telework.

6. Furthermore, 18 CFR 385.2007(a)(2) only addresses the “last day of any time period,” and this final rule only addresses the computation instances in which the Commission is closed on the last day of a time period. This final rule also does not change the computation of time in instances when the Commission is closed for part of the day, but reopens prior to the official close of business.
