The questionnaires will be sent to from approximately 2,947 reporting units (RU), representing 3,169 local jails and 12 Federal Bureau of Prisons (BOP) detention facilities that function as jails. BJS will contact these central reporters and request that they report data for all facilities (3,181) under their jurisdictional authority. Based on prior years' reporting and the cognitive test of the new items conducted in August–December 2018, BJS estimates a reporting time of 150 minutes for CJ-3, 100 minutes for CJ-3A, and 50 minutes for the CJ-3A ADDENDUM. If needed, jail respondents will be contacted by email or telephone to verify data quality issues. BJS estimates that data quality follow-up validation will run an average of 10 minutes across 1,620 RUs. Some RUs may receive follow-up validation for multiple facilities (resulting in a total of 1,749 facilities from the original 1,620 RUs) under their jurisdictional authority. In addition, we estimate that 300 RUs will be contacted during the jail frame update stage to verify facility operational status and point-of-contact, which takes 5 minutes each on average. In total, the 2019 COJ will incur a burden estimate of 7,879 hours or about 2 hours and 30 minutes per RU for data collection and 10 minutes or less for select RUs contacted for data quality follow-up validation or facility operational status and point-of-contact validation.
