

The regulations in subpart C of part 93 pertain to the importation of horses and include requirements for privately owned quarantine facilities for horses. For permanent, privately owned quarantine facilities, these requirements entail certain information collection activities, including environmental certification, application for facility approval, service agreements, requests to APHIS concerning withdrawal of facility approval, notification to APHIS of facility closure, compliance agreements, security procedures, alarm notification, lists of personnel, signed statements, daily logs and recordkeeping, and requests for variance.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 0.16 hours per response.

Respondents: Applicants who apply for facility approval; owners and operators of permanent, privately owned horse quarantine facilities; facility employees; authorities who issue and complete environmental certifications; and employees of security companies.

Estimated annual number of respondents: 6.

Estimated annual number of responses per respondent: 20.5.

Estimated annual number of responses: 123.

Estimated total annual burden on respondents: 20 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual

number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 11th day of February 2019.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

SUPPLEMENTARY INFORMATION:

Title: National Animal Health Reporting System (NAHRS).

OMB Control Number: 0579-0299.

Type of Request: Reinstatement of an information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal Plant Health Inspection Service (APHIS) is authorized, among other things, to prohibit or restrict the importation and interstate movement of animals and other articles to prevent the introduction and interstate spread of livestock diseases and to eradicate such diseases from the United States when feasible. In connection with this mission, APHIS operates the National Animal Health Reporting System (NAHRS), which collects, on a national basis, data monthly from State veterinarians on the presence or absence of diseases of interest to the World Organization for Animal Health (OIE).

As a member country of OIE, the United States must submit reports to the OIE on the status of certain diseases in specific livestock, poultry, and aquaculture species. Reportable diseases are diseases that have the potential for rapid spread, irrespective of national borders, that are of serious socioeconomic or public health consequence, and that are of major importance in the international trade of animals and animal products. The potential benefits to trade of accurate reporting on the health status of the U.S. commercial livestock, poultry, and aquaculture industries include expansion of those industries into new export markets, and preservation of existing markets through increased confidence in quality and disease freedom. This data collection is unique in terms of the type, quantity, and frequency; no other entity is collecting and reporting data to the OIE on the health status of U.S. livestock, poultry, and aquaculture.

We are asking the Office of Management and Budget (OMB) to approve these information collection activities for 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our

information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 8 hours per response.

Respondents: State animal health officials.

Estimated annual number of respondents: 52.

Estimated annual number of responses per respondent: 12.

Estimated annual number of responses: 624.

Estimated total annual burden on respondents: 4,992 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.
