

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for the regulations published at 40 CFR part 63, subpart L apply to all coke oven batteries, whether existing, new, reconstructed, rebuilt, or restarted. It also applies to all batteries using conventional by-product recovery processes, non-recovery processes, or any new recovery processes. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance with 40 CFR part 63, subpart L.

Form Numbers: None.

Respondents/affected entities: Coke oven batteries.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart L).

Estimated number of respondents: 19 (total).

Frequency of response: Initially, occasionally, and semiannually.

Total estimated burden: 79,800 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$8,730,000 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an adjustment decrease in labor hours from the most recently approved ICR. This decrease reflects revisions to the number of existing respondents that are anticipated to reconstruct or close batteries subject to this standard; the burden reflected in this ICR assumes that reconstruction for one existing facility has been completed. This decrease is not due to any program changes.

Director, Regulatory Support Division.

OMB Control Number: 3084-0094.

Type of Review: Extension of currently approved collection.

Abstract: Pursuant to the OMB regulations, 5 CFR part 1320, that implement the PRA, 44 U.S.C. 3501 *et seq.*, the FTC is providing a second opportunity for public comment while seeking OMB approval to renew the pre-existing clearance for the Rule. The Rule, which implements the Energy Policy Act of 1992, Public Law 102-486, requires disclosure of specific information on labels posted on fuel dispensers for non-liquid alternative fuels. To ensure the accuracy of these disclosures, the Rule also requires that sellers maintain records substantiating product-specific disclosures they include on these labels.
