SUPPLEMENTARY INFORMATION:

Title of Collection: NSF I-Corps Teams Executive Summary Form.

OMB Control No.: 3145-New.

Expiration Date of Approval: Not applicable.

Abstract: The NSF Innovation Corps (I-Corps) Teams Program Executive Summary is an important component of the NSF I-Corps Teams pre-submission process and conveys information needed to direct the proposed team project to the appropriate NSF Program Director (PD) for review and possible proposal submission invitation. This Executive Summary (ES) is to be submitted by the applying team to the cognizant I-Corps Team's PD outlining solicitation-specific aspects of the project (such as proposed team members, technology, commercial application and NSF lineage). In the past, this ES was submitted via email as an attached two-page (maximum) document and was often in varying formats or missing some parts of the required ES elements. The NSF I-Corps Teams Executive Summary Form captures the same requested information, as outlined in NSF I-Corps Teams Program solicitation, but all within one secure, web-based form. In specific, the form collects submitting team member information (composition, roles and a brief description of each member's qualifications), Principal Investigator (PI) information (and a brief description of their connection to the team), NSF lineage (relevant current or previous NSF awards), a brief description of the core technology, a brief description of the potential commercial application, and a brief description of the current commercialization plan for the proposed technology. If the proposed I-Corps Team is applying based on participation in a local or regional NSF I-Corps Site or Node training session, the form will provide fields for the applying team to complete regarding the associated I-Corps Site or Node senior member's contact information (as a reference) and location of the associated Site or Node.

Respondents: Investigators who submit proposals to NSF's I-Corps Teams Program.

Estimated Number of Annual Respondents: 400.

Burden on the Public: 2 hour (per response) for an annual total of 800 hours.

Dated: February 28, 2019.

SUPPLEMENTARY INFORMATION:

Title of Collection: NSF Small Business Innovation Research (SBIR) Program Phase I and Small Business Technology Transfer (STTR) Program Phase I Presubmission Project Pitch Form.

OMB Control No.: 3145-New.

Expiration Date of Approval: Not applicable.

Abstract: The NSF Small Business Innovation Research Program (SBIR) Phase I and Small Business Technology Transfer Program (STTR) Phase I Project Pitch is the new NSF SBIR/STTR pre-submission process that conveys information needed to direct the proposed SBIR/STTR project to the appropriate NSF Program Director (PD) for review and possible proposal submission invitation. This Project Pitch is to be submitted by the applying small business (as "proposer") to the relevant NSF SBIR/STTR Phase I technology topic. The Project Pitch

outlines solicitation-specific aspects of the project (such as the proposed technology innovation and project objectives with associated level of technical risk). In the past, this Project Pitch (previously referred to as the Executive Summary) was an optional submission via email as an attached two to three-page (maximum) document and was often in varying formats or missing some parts of the required document elements, which in turn caused delays or additional corrections on behalf of the proposer. The NSF SBIR/STTR Phase I Project Pitch form captures the same requested information, as outlined in the NSF SBIR/STTR Phase I Program solicitation, but all within one secure, web-based form. In specific, the form collects submitting proposer company and team information; the proposed technology innovation; the technical objectives and challenges; and the market opportunity. The form also allows the proposer to choose (from a drop-down menu) the most relevant NSF SBIR/STTR Phase I technical topic area, ensuring that the submitted Project Pitch goes to the most appropriate Program Director.

Respondents: Small businesses who submit proposals to NSF's SBIR/STTR Phase I Program.

Estimated Number of Annual Respondents: 2000.

Burden on the Public: 2 hours (per response) for an annual total of 4000 hours.

Dated: February 28, 2019.
