

validity of the methodology and assumptions used; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Proposed collection Title: Generic Clearance for Conferences, Meetings, Workshops, Poster Sessions and Registration (OD), EXTENSION, 0925–0740, Expiration *Date:* 05/2019, National Institutes of Health (NIH), Office of the Director (OD).

Need and Use of Information Collection: This information collection will continue to allow NIH to select the most appropriate participants for non-

grantee activities sponsored, organized, and run by NIH staff, according to the type and purpose of the activity. For example, NIH may develop an application process or information collection to select a limited number of researchers to participate in a poster session, identify speakers and panelists with desired expertise on a specific topic to be covered at a meeting, or determine which researchers would most likely benefit from a training course or other opportunity. For NIH to plan and conduct activities that are timely for participants and their fields of research, it is often necessary for such information to be collected with a relatively short turnaround time. In general, submitted abstracts or other application materials will be reviewed by an internal NIH committee responsible for planning the activities.

This committee will be responsible for selecting and notifying participants.

The information collected for these activities generally includes title, author(s), institution/organization, poster size, character limitations along with other requirements. This information is necessary to identify attendees as eligible for poster presentations, to present their research, speak on panels, and discuss innovative approaches to science and technology to their peers. The registration form collects information from interested parties necessary to register them for a workshop.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 8,875.

Formal requests for additional plans and instruments must be requested in writing.

SUPPLEMENTARY INFORMATION: Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 requires: Written comments and/or suggestions from the public and affected agencies are invited to address one or more of the following

points: (1) Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (2) The accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Proposed Collection Title: Hazardous Waste Worker Training Grantee Data Collection—42 CFR part 65, 0925–0348, Expiration Date 03/31/2019 REINSTATEMENT WITH CHANGE, National Institute of Environmental Health Sciences (NIEHS), National Institutes of Health (NIH).

Need and Use of Information Collection: This request for OMB review

and approval of the information collection is required by regulation 42 CFR part 65(a)(6). The National Institute of Environmental Health Sciences (NIEHS) was given major responsibility for initiating a worker safety and health training program under Section 126 of the Superfund Amendments and Reauthorization Act of 1986 (SARA) for hazardous waste workers and emergency responders.

A network of non-profit organizations that are committed to protecting workers and their communities by delivering high-quality, peer-reviewed safety and health curricula to target populations of hazardous waste workers and emergency responders has been developed. In thirty-one years (FY 1987–2018), the NIEHS WTP has successfully supported 20 primary grantees that have trained more than 4.1 million workers across the country and

presented over 245,830 classroom and hands-on training courses, which have accounted for over 50 million contact hours of actual training. Generally, the grant will initially be for one year, and subsequent continuation awards are also for one year at a time. Grantees must submit a separate application to have the support continued for each subsequent year. Grantees are to provide information in accordance with S65.4(a), (b), (c) and 65.6(a) on the nature, duration, and purpose of the training, selection criteria for trainees' qualifications and competency of the project director and staff, cooperative agreements in the case of joint applications, the adequacy of training plans and resources, including budget and curriculum, and response to meeting training criteria in OSHA's Hazardous Waste Operations and Emergency Response Regulations (29

CFR 1910.120). As a cooperative agreement, there are additional requirements for the progress report section of the application. Grantees are to upload their information into the WTP Grantee Data Management System. The information collected is used by the Director through officers, employees, experts, and consultants to evaluate applications based on technical merit to determine whether to make awards and whether appropriate training is being conducted to support continuation of the grant into subsequent years. The annualized cost to respondent's time is estimated at: \$19,867.86. There are no Capital Costs, Operating Costs and/or Maintenance Costs to report.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 616.

SUPPLEMENTARY INFORMATION:

Extension of Comment Period

On December 21, 2018, CBP published a notice in the Federal Register (83 FR 65703) announcing "The 21st Century Customs Framework" initiative and public meeting. This document announces that the public comment period that previously closed on February 4, 2019, will be re-opened for a period of 30 days. To allow for the submission of comments following the March 1, 2019 public meeting, and to maximize public participation and input on the key themes described below, CBP has decided to allow additional time for the public to submit comments. Accordingly, the comment period is re-opened until April 11, 2019, and comments must be received by CBP on or before that date.

21st Century Customs Framework Initiative Overview

CBP is cognizant of the need to stay modern in order to meet the challenges of an evolving trade landscape. New
