Proposed Collection Title: NIDA Summer Research Internship Program, 0925-0738, Expiration 03/31/2019, REINSTATEMENT WITH CHANGE, National Institute on Drug Abuse (NIDA), National Institutes of Health (NIH).

Need and Use of Information Collection: The purpose of the proposed

information is for the selection of interns for the continuing NIDA Summer Research Internship Program. This request is to allow NIDA to collect information from applicants in order to meet the goals of the program and IC mission. Applicant eligibility for this program was 17 years, but is now open to those 18 and over in the year of application per NIH policy document.

2019 High School Summer Internship Program (HS-SIP) Policy. NIDA will request clearance for any additional forms should new programs be introduced in the future. The information ensures that students applying to this program meet basic eligibility requirements; indicates their interest in substance abuse research, future career goals, and, if selected for the program, what research they prefer to conduct. The information also enables decision-making regarding which applicants will be selected for internships. In each case, completing the application is voluntary, but in order to receive due consideration, the prospective applicant must complete all fields required by the program. OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 250.

Need and Use of Information Collection: This information collection will continue to allow NIH to select the most appropriate participants for non-

grantee activities sponsored, organized, and run by NIH staff, according to the type and purpose of the activity. For example, NIH may develop an application process or information collection to select a limited number of researchers to participate in a poster session, identify speakers and panelists with desired expertise on a specific topic to be covered at a meeting, or determine which researchers would most likely benefit from a training course or other opportunity. For NIH to plan and conduct activities that are timely for participants and their fields of research, it is often necessary for such information to be collected with a relatively short turnaround time. In general, submitted abstracts or other application materials will be reviewed by an internal NIH committee responsible for planning the activities.

This committee will be responsible for selecting and notifying participants.

The information collected for these activities generally includes title, author(s), institution/organization, poster size, character limitations along with other requirements. This information is necessary to identify attendees as eligible for poster presentations, to present their research, speak on panels, and discuss innovative approaches to science and technology to their peers. The registration form collects information from interested parties necessary to register them for a workshop.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 8,875.
