

with the enforceable polices of the approved coastal zone management programs administered by the States of Washington and Oregon. In September 2017, Ecology and Oregon sent conditional concurrences in response to the EPA's Consistency Determination. The EPA and Ecology resolved Ecology's conditional concurrence through the addition of monitoring requirements in the General Permit. However, the EPA and Oregon did not reach resolution; thus, Oregon's conditional concurrence became an objection. Therefore, as required by 15 CFR 930.31(d), the EPA is notifying potential users of the General Permit that the General Permit is not available for use in the State of Oregon unless the potential user provides Oregon with a consistency certification under 15 CFR part 930, subpart D and Oregon concurs. The EPA does not anticipate that potential users of the General Permit will need to provide Oregon with a consistency certification because the General Permit does not authorize discharges within the State of Oregon, including Oregon state waters, and NOAA has not authorized Oregon to review such activities under 15 CFR part 930, subpart D. As such, the EPA anticipates that it will be able to acknowledge permit coverage for individual operations promptly after receipt of a Notice of Intent.

Impact on Small Businesses

After review of the facts as presented in the permit applications, fact sheets, and response to comments document, the EPA concludes that this general NPDES permit will not have a significant impact on a substantial number of small entities. Moreover, this Permit does not present a significant administrative burden on regulated sources.

Dated: March 1, 2019.

Daniel D. Opalski,

Office Director, Office of Water and Watersheds, Region 10.

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OECA-2014-0086; FRL-9990-10-OEI]

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Flexible Polyurethane Foam Fabrication (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NESHAP for Flexible Polyurethane Foam Fabrication (EPA ICR No. 2027.07, OMB Control No. 2060-0516), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through March 31, 2019. Public comments were previously requested, via the **Federal Register**, on May 30, 2018 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before April 17, 2019.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OECA-2014-0086, to: (1) EPA online using www.regulations.gov (our preferred method), or by email to docket.oeca@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460; and (2) OMB via email to oira_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A,

Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 564-2970; fax number: (202) 564-0050; email address: yellin.patrick@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov, or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Integrated Iron and Steel Manufacturing Facilities (40 CFR part 63, subpart FFFFF) apply to new and existing sinter plants, blast furnaces, and basic oxygen process furnace shops at integrated iron and steel manufacturing facilities that are major sources of hazardous air pollutants (HAPs) or are co-located at major sources. New facilities include those that commenced either construction or reconstruction after the date of proposal. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP. This information is being collected to assure compliance with 40 CFR part 63, subpart FFFFF.

Form Numbers: None.

Respondents/affected entities: Flexible polyurethane foam fabrication facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart MMMMM).

Estimated number of respondents: 20 (total).

Frequency of response: Initially, occasionally, semiannually, and annually.

Total estimated burden: 22,200 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$2,560,000 (per year), which includes \$34,500 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an increase in the total estimated respondent burden compared with the ICR currently approved by OMB. The increase in burden is not due to any program changes, but is due to an adjustment. The adjustment increase in burden from the most-recently approved ICR is due to an increase in the number of new or modified sources due to continued industry growth. In addition, the burden estimate for reading and understanding the rule requirements was adjusted to reflect the time it would take existing respondents to review the rule each year. The overall result is an increase in burden and costs.

Courtney Kerwin,

Director, Regulatory Support Division.

Abstract: The Landfill Methane Outreach Program (LMOP), created by EPA in 1994, is a voluntary program designed to encourage and facilitate the development of environmentally and economically sound landfill gas (LFG) energy projects across the United States to reduce methane emissions from landfills. LMOP meets these objectives by educating local governments and communities about the benefits of LFG recovery and use; building partnerships between state agencies, industry, energy service providers, local communities, and other stakeholders interested in developing this valuable resource in their community; and providing tools to evaluate LFG energy potential. EPA signs voluntary Memoranda of Understanding (MOUs) with these organizations to enlist their support in promoting cost-effective LFG utilization. The information collection includes completion and submission of the MOU, periodic information updates, and annual completion and submission of basic information on landfill methane projects with which the organizations are involved as an effort to update the LMOP Landfill and Landfill Gas Energy

Project Database. The information collection is to be utilized to maintain up-to-date data and information about LMOP Partners and LFG energy projects with which they are involved. The data will also be used by the public to access LFG energy project development opportunities in the United States. In addition, the information collection will assist the program in evaluating the reduction of methane emissions from landfills.

Form Numbers: 5900-157, 5900-158, 5900-159, 5900-160, and 5900-161.

Respondents/affected entities: Private companies and municipalities that own or operate landfills; manufacturers and suppliers of equipment/knowledge to capture and utilize LFG; utility companies; end-users of energy from landfills; developers of LFG energy projects; State agencies; and other LFG energy stakeholders.

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: 1,137 (total).

Frequency of response: On occasion.

Total estimated burden: 2,270 hours (per year). Burden is defined at 5 CFR 1320.03(b)

Total estimated cost: \$194,890 (per year) total annual respondent burden, includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is decrease of 252 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to transition to an electronic collection of updates to landfill methane projects with which the organizations are involved.

Courtney Kerwin,

Director, Regulatory Support Division.
