**Abstract:** The National Emission Standards for Hazardous Air Pollutants (NESHAP), for Nine Metal Fabrication and Finishing Area Sources (40 CFR part 63, subpart XXXXX) apply to owners or operators of any existing or new metal fabrication and finishing facility that is an area source of hazardous air pollutant (HAP) emissions and uses or has the potential to emit metal fabrication or finishing metal HAP (MFHAP), defined to be the compounds of cadmium, chromium, lead, manganese, and nickel, or any of these metals in the elemental form with the exception of lead. The affected sources consist of several types of metal...
fabrication and finishing processes, including any abrasive blasting, metalworking (which includes machining, and dry grinding and dry polishing with machines), spray painting, and welding operations. New facilities include those that commenced construction or reconstruction after the date of proposal. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP. This information is being collected to assure compliance with 40 CFR part 63, subpart XXXXXX.

Form Numbers: None.

Respondents/affected entities: Owners and operators of facilities in the nine metal fabrication and finishing source categories.

Respondent’s obligation to respond: Mandatory (40 CFR part 63, subpart XXXXXX).

Estimated number of respondents: 5,800 (total).

Frequency of response: Initially, occasionally and annually.

Total estimated burden: 39,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $4,440,000 (per year), which includes $0 for annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the labor hours and cost in this ICR compared to the previous ICR. This is due to the addition of burden hours to more accurately account for the time spent by existing facilities to re-familiarize themselves annually with the rule requirements.
