[Docket No. RM98–1–000]

Public Notice: Records Governing Off-the-Record Communications

This constitutes notice, in accordance with 18 CFR 385.2201(b), of the receipt of prohibited and exempt off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive a prohibited or exempt off-the-record communication relevant to the merits of a contested proceeding, to deliver to the Secretary of the Commission, a copy of the communication, if written, or a summary of the substance of any oral communication.

Prohibited communications are included in a public, non-decisional file associated with, but not a part of, the decisional record of the proceeding. Unless the Commission determines that the prohibited communication and any responses thereto should become a part of the decisional record, the prohibited off-the-record communication will not be considered by the Commission in reaching its decision. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record communication, and may request that

the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such a request only when it determines that fairness so requires. Any person identified below as having made a prohibited off-the-record communication shall serve the document on all parties listed on the official service list for the applicable proceeding in accordance with Rule 2010, 18 CFR 385.2010.

Exempt off-the-record communications are included in the decisional record of the proceeding, unless the communication was with a cooperating agency as described by 40 CFR 1501.6, made under 18 CFR 385.2201(e) (1) (v).

The following is a list of off-the-record communications recently received by the Secretary of the Commission. The communications listed are grouped by docket numbers in ascending order. These filings are available for electronic review at the Commission in the Public Reference Room or may be viewed on the Commission’s website at <http://www.ferc.gov> using the eLibrary link. Enter the docket number, excluding the last three digits, in the docket number field to access the document. For assistance, please contact FERC Online Support at FERCOnlineSupport@ferc.gov or toll free at (866) 208–3676, or for TTY, contact (202)502–8659.

Docket No.	File date	Presenter or requester
Prohibited: CP17–101–000	3/12/19	Larson Design Group.
Exempt: P–13318–003	3/12/19	Advisory Council on Historic Preservation.

Dated: March 19, 2019.

Nathaniel J. Davis, Sr.,
Deputy Secretary.

[Project No. 14960–000]

Renewable Energy Aggregators; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On January 10, 2019, Renewable Energy Aggregators filed an application

for a preliminary permit, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of the Big Rock Pumped Storage Hydro Project to be located in Big Rock in Buchanan County, Virginia. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners’ express permission.

The proposed project would consist of the following: (1) A new upper reservoir with a surface area of 27 acres and a storage capacity of 404.97 acre-feet at a surface elevation of approximately 1,883 feet above mean sea level (msl) created

through construction of a new roller-compacted concrete or rock-fill dam; (2) a new lower reservoir with a surface area of 9.13 acres and a storage capacity of 547.76 acre-feet at a surface elevation of 1,241 feet msl; (3) a new 2,053-foot-long, 4-foot-diameter penstock connecting the upper and lower reservoirs; (4) a new 150-foot-long, 50-foot-wide, 25-foot-high powerhouse containing as many as two turbine-generator units with a total rated capacity of 20 megawatts; (5) a new transmission line connecting the powerhouse to a nearby electric grid interconnection point with options to evaluate multiple grid interconnection locations; and (6) appurtenant facilities. The proposed project would have an annual generation of 86,449.37 megawatt-hours.
