

Estimated number of respondents: 50 respondents, consisting of 32 hydronic heater manufacturers, 7 forced-air furnace manufacturers, and 11 companies that are EPA-approved testing laboratories, third-party certifiers or both.

Frequency of response: Annual.

Total estimated burden: 4,270 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$4,770,000 (per year), which includes \$4,280,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: The increase in burden from the most recently-approved ICR is due to an increase in the number of respondents and an increase in the number of testing labs and third-party certifiers. The increase in burden is also due to an adjustment to the burden for reporting by third-party certifiers to include burden for submittal of certifications, QA audit program reports, and credentials. Additionally, there is an increase in the annual average capital/startup costs as compared with the costs in the previous ICR, due to a number of testing labs and third-party certifiers expected to re-apply for re-accreditation in the three-year period. The overall result is an increase in the number of responses and in the burden.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OECA-2014-0104; FRL-9991-02-OEI]

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Polyvinyl Chloride and Copolymer Production Area Sources (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), "NESHAP for Polyvinyl Chloride and Copolymer Production Area Sources (EPA ICR No. 2454.03, OMB Control No. 2060-0684), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through March 31,

2019. Public comments were previously requested, via the **Federal Register**, on May 30, 2018 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before April 25, 2019.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OECA-2014-0104, to: (1) EPA online using www.regulations.gov (our preferred method), or by email to docket.oeca@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460; and (2) OMB via email to oira_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 564-2970; fax number: (202) 564-0050; email address: yellin.patrick@epa.gov.

SUPPLEMENTARY INFORMATION: Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov, or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Polyvinyl Chloride and Copolymers Production Area Sources (40 CFR part 63, subpart DDDDDDD) apply to existing facilities and new PVC and copolymer production facilities that are an area source of hazardous air

pollutants (HAP). This ICR includes burden estimates for area sources only. Major sources are regulated under NESHAP Subpart HHHHHHHH and their burdens are included in a separate ICR (OMB Control Number 2060-0666). New facilities include those that commenced construction or reconstruction after the date of proposal. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP. This information is being collected to assure compliance with 40 CFR part 63, subpart DDDDDDD.

Form Numbers: None.

Respondents/affected entities: Polyvinyl chloride and copolymer production area source facilities.

Respondent's obligation to respond: Mandatory (40 CFR 63, Subpart DDDDDDD).

Estimated number of respondents: 4 (total).

Frequency of response: Initially, semiannually and annually.

Total estimated burden: 92,300 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$11,900,000 (per year), which includes \$1,440,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an increase in the burden labor hours and cost in this ICR compared to the previous ICR. This increase is not due to any program changes. The adjustment increase in burden is due to an increase in the number of respondents to reflect one additional existing facility. There is also an adjustment increase to the operation and maintenance costs due to the additional respondent, as well as an increase in the estimated cost for testing thermal oxidizers for process vents.

Courtney Kerwin,

Director, Regulatory Support Division.
