Abstract: Under the authority of sections 3004, 3005, 3008 and 3010 of the Resource Conservation and Recovery Act (RCRA), as amended, EPA revised the RCRA hazardous waste permitting program to allow a "standardized permit." The standardized permit is available to facilities that generate hazardous waste and routinely manage the waste on-site in non-thermal units such as tanks, containers, and containment buildings. In addition, the standardized permit is available to facilities that receive hazardous waste generated off-site by a generator under the same ownership as the receiving facility, and then store or non-thermally treat the hazardous waste in containers, tanks, or containment buildings. The RCRA standardized permit consists of two components: A uniform portion that is included in all cases, and a supplemental portion that the Director of a regulatory agency includes at his or her discretion. The uniform portion consists of terms and conditions, relevant to the unit(s) at the permitted facility, and is established on a national basis. The Director, at his or her discretion, may also issue a supplemental portion on a case-by-case basis. The supplemental portion imposes site-specific permit terms and

conditions that the Director determines necessary to institute corrective action under section 264.101 (or state equivalent), or otherwise necessary to protect human health and the environment. Owners and operators have to comply with the terms and conditions in the supplemental portion, in addition to those in the uniform portion.

Form Numbers: None.

Respondents/affected entities: Entities potentially affected by this action are business or other for-profit.

Respondent's obligation to respond: Voluntary (40 CFR 270.275).

Estimated number of respondents: 1.

Frequency of response: One time.

Total estimated burden: 218 hours per year. Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$11,612 (per year), includes \$525 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 13,730 hours for this renewal. This decrease is based on the decrease from the estimated number of respondents from 86 to 1. In the 13 years since the Standardized Permit Rule was finalized, there has only been one such permit issued.

Television and Class A television broadcast stations may make these announcements visually or aurally.

47 CFR 74.783(b) requires licensees of television translators whose station identification is made by the television station whose signals are being rebroadcast by the translator, must secure agreement with this television station licensee to keep in its file, and available to FCC personnel, the translator's call letters and location, giving the name, address and telephone number of the licensee or his service representative to be contacted in the event of malfunction of the translator. No other insertion between the station's call letters and the community or communities specified in its license is permissible. A station may include in its official station identification the name of any additional community or communities, but the community to which the station is licensed must be named first.

47 CFR 74.783(e) permits low power TV permittees or licensees to request to be assigned four-letter call signs in lieu

of the five-character alpha-numeric call signs.

47 CFR 74.1283(c)(1) requires a FM translator station licensee whose identification is made by the primary station must arrange for the primary station licensee to furnish the translator's call letters and location (name, address, and telephone number of the licensee or service representative) to the FCC.
